

President Wilson Declares Only to Save Our Honor Should We Enter the War.

PRESIDENT BARES SOUL
BEHIND CLOSED DOORS.Patriotic Words to Gridiron Club Brings
Hearers to Their Feet Cheering.Unusually Grave, He Says He Would be Just as Ashamed
of a Rash Act that Would Throw Us into the European
Conflict as He Would to be Termed a Coward—Says
Valor Strikes when Sword Carries Light of Heaven.

(BY A. P. NIGHT WIRE.)

WASHINGTON, Feb. 27.—President Wilson told members and guests at Gridiron Club dinner last night that America ought to keep out of the European war "at the sacrifice of everything except this single thing upon which her character and her history are founded, her sense of humanity and justice."

The address was confidential, since the speeches at the dinner of the Gridiron Club, composed of newspaper correspondents, are not reported. It was made public tonight, however, because many of those who heard it urged that it should go to the country.

The President spoke of the nation's affairs with unusual gravity. His hearers, including several hundred members of Congress, government officials, business men and correspondents, were brought to their feet cheering when he concluded with these words:

"I would be just as much ashamed to be rash as I would to be a coward. Valor is self-respecting. Valor is circumspect. Valor strikes only when it is right to strike. Valor withholds itself from all small implications and entanglements and waits for the great opportunity when the sword will flash as if it carried the light of heaven on its blade."

THE PRESIDENT'S TALK.

The address in part follows: "Four talks, Mr. Toastmaster, has been a great deal about candidacy for the Presidency. It is not a new feeling on my part. But one of the I maintain with greater intensity than formerly, that a man who seeks the Presidency of the United States for anything that will bring to him is an audacious fool. The responsibilities of the office ought to sober a man even before he approaches it. One of the difficulties of the office is that it is a great deal more than a job. It is a duty. It is a duty that I dare say, that it is very difficult to think while so many people are talking, and particularly while so many people are talking in a way that obscures counsel and is entirely off the point.

"The point in national affairs, gentlemen, never lies along the lines of expediency. It always rests in the field of principle. The United States was not founded upon any principle of expediency. It was founded upon a profound principle of human liberty and of humanity, and whenever it comes its policy upon any other foundation, it is a betrayal of its trust."

GERMANS CHOOSE BAD TIME
FOR OFFENSIVE AT VERDUN.

(BY ATLANTIC CABLE AND A. P.)

LONDON, Feb. 27.—A delayed dispatch from the correspondent of Reuters Telegram Company at British headquarters in the field, dated Thursday, says that the Germans could not have chosen a more inopportune time for the offensive against Verdun. At the beginning of the attack the weather suddenly changed to the most severe winter spell in several years and the snow and frost seriously hamper their movements.

The great activity in the Ypres

TWO MEN KILLED
IN AUTO WRECK.

MACHINE PLUNGES OVER EMBANKMENT NEAR CLIFTON.

Four Others are Injured, but not seriously—Car Becomes Unmanageable at the "Shannon Y." Swerves from Road and Plunges Victim Beneath Trucks.

(BY A. P. NIGHT WIRE.)

CLIFTON (Ark.) Feb. 27.—Two men were killed and four others injured on the Clifton-Morenci road at 5 o'clock this afternoon when an automobile, in which they were riding, became beyond control, plunged over an embankment and turned over.

The dead: ARCHIBALD MORRISON, superintendent of the Arizona Copper Company concentrator, at Clifton.

E. C. HECK, superintendent of the Clifton city waterworks.

The injured: H. M. Merrill, Clifton livestock and driver of the machine.

Ben Ferguson.

C. H. Hoyt.

William O'Brien.

The accident occurred three and a half miles from Clifton at a point on the road known as the "Shannon Y." Merrill, who was at the wheel, turned to speak to those in the rear seat. As he attempted to face front his body became wedged against the steering wheel. The machine swerved from the narrow road and before Merrill could recover control had gone over the embankment. The machine turned completely over, pinning Morrison and Heck underneath. Merrill was thrown forward and landed on his head, sustaining a fractured arm. Each of the other three suffered broken bones and were in a helpless condition, when Ambrose Spedie arrived in another car. Morrison was dead when taken over and Heck was in a dying condition. With difficulty Spedie placed the five injured men in his car and raced into Clifton to the Arizona Copper Company hospital, where Heck

EARTHQUAKE RECORDED.

Seismographs at Washington, Santa Clara and in Kansas Inscribe Disturbance, Which is Located Many Thousand Miles Away.

(BY A. P. NIGHT WIRE.)

WASHINGTON, Feb. 27.—Violent earthquake shocks at an estimated distance from Washington of 2100 miles were recorded today by the Georgetown University seismograph. The vibrations began at 3:27 p.m. and continued for several hours, being most pronounced between 3:37 and 3:40 o'clock.

SANTA CLARA RECORDS SHOCK.

(BY A. P. NIGHT WIRE.)

SAN JOSE, Feb. 27.—The observatory at Santa Clara reports that a very pronounced earthquake record was inscribed on the horizontal seismograph today, beginning at 12:33 p.m. and continuing in the form of a sinusoidal curve for more than two hours. According to calculations made by Prof. Albert J. Newlin, the epicenter was approximately 5000 miles distant.

FELT IN KANSAS.

(BY A. P. NIGHT WIRE.)

LAWRENCE (Kan.) Feb. 27.—A heavy terrestrial disturbance was registered by the seismograph at the University of Kansas at 2:16 o'clock this afternoon. Attendees asserted the waves indicated the shock emanated probably from Central America.

SHOCK IN NICARAGUA.

(BY ATLANTIC CABLE AND A. P.)

SAN JUAN DEL SUR (Nicaragua) Feb. 27.—An earthquake shock of moderate intensity was reported to have been felt in San Jose, Costa Rica and in the Department of Rivas, Nicaragua. The principal church in the town of Rivas was damaged. No deaths have been reported.

Call of Republicans.

(Continued from First Page.)

set forth the list of names submitted by the St. Francis conference of a harmony ticket," said Mr. Carey today. "I have read the accounts of the meeting carefully and talked with the members of the committee. The meeting which was announced as a gathering of Republicans was in reality a packed meeting of one faction. I am forced to this conclusion by the fact that no one who was not named in the call was permitted to take part in the deliberations. No motion could be offered or vote cast except by those who had been selected by Guy Earl and two others. Then, too, what can one say of a conference that called in the name of harmony and that promptly indorses a ticket which was published on the streets before a large part of the supposed delegates had arrived in San Francisco. I have known something of Republican procedure for a great many years, but I never before heard of a rump convention being held in the name of harmony."

SHOWN UP.

Harry Encl, floor leader of the House, said today that the ticket named at the St. Francis is eminently satisfactory to the Progressives. Assemblyman Ryan, one of the members of the legislative pay-roll brigade, added to this that it was so satisfactory that most of the Progressives of the northern part of the State would probably declare themselves as Republicans on primary day in order to vote for it.

An indication of the strength of the Johnson element of Progressives in the State was shown when a resolution was introduced at the meeting by Republicans here to have a resolution presented enforcing the present anti-rump law.

This was entrusted to Henry Owens, chairman of the Republican campaign in the State, and the members of the resolution were not even read.

The Johnson element of Progressives in the State was shown when a resolution was introduced at the meeting by Republicans here to have a resolution presented enforcing the present anti-rump law.

"That was about as appropriate," remarked Chairman Carey today, "as for a Democratic conference to meet and indorse the administration of President Wilson. It showed clearly the real nature of the conference."

Thrilling.

MAN IS RESCUED
FROM ICY TREE.BOY BRAVES DANGERS OF FLOOD
IN DES MOINES RIVER.

Despite Strong Current and Floating Debris He Guides Boat to Place Where Victim Had Clung for His Life for Many Hours Last Saturday Night.

(BY A. P. NIGHT WIRE.)

OSKALOOSA (Iowa) Feb. 27.—In a thrilling rescue by Ray Ellis, an 18-year-old boy, Charles Thomas was taken last Saturday night half frozen and nearly lifeless from a tree in the flooded and ice packed Des Moines River, where he had clung to the branches seven hours after seeing a companion drown.

Thomas and A. E. Rommel, Mahaska county engineers, were in a party attempting to dynamite the ice when the boat was overturned in the stream. Rommel perished. Thomas caught in the top of a tree which had been submerged partly by the flood.

Thomas, a slender, well-built, with great oaks of ice hurled onward by the swift current, it was deemed impossible to reach Thomas until the youth, who had been clinging to the tree, was rescued.

Death nearly balked the rescue at the last moment. In his exhausted, fell and dropped into the water. He sank, but came up and dragged him into the skiff.

There are three small steamers of the line, which are being used to pull the logs and debris out of the river.

GERMAN SHELLS
CUT THE WAY.Correspondent Says Huge Guns
Open the First Attack.With a Path Cleared, Infantry
Begins Desperate Charge.Teutons Reach Beaumont at
End of Fourth Day.

(BY ATLANTIC CABLE AND A. P.)

BERLIN, Feb. 26, 1 p.m. (via London, Feb. 27, 1 p.m.)—The correspondent before Verdun of the Berliner Zeitung am Mittag telegraphs that the operations against the French fortress began at 8:30 o'clock in the morning of February 21, along the whole sector to the eastward of the River Meuse, from near Convoys to the neighborhood of Azannes, with a tremendous bombardment lasting late into the afternoon.

German flyers kept the French aviators away and prevented them from making observations.

At 5 o'clock German infantry attacked, gaining ground first in the center to the southward of Flabas and toward the forest of Haumont. The whole wooded territory was filled with German troops and the artillery had moved paths and the forest was completely occupied by 9 o'clock in the evening.

The same co-operation of German artillery and infantry was repeated the following day, the batteries aiming further to the southward. The attack began at 5 o'clock in the afternoon on the mining village of Haumont and within a half hour the village and the Caumont forest further to the eastward were penetrated.

On February 23 the Brabant position, as well as those in the valley between the Caumont forest and the eastward were penetrated.

The correspondent declares that the German losses were not very great.

On the evening of that day the German forces were further to the eastward were penetrated.

Liner Sinks.

(Continued from First Page.)

that both passengers and crew behaved splendidly.

OFFICIALS ON BOARD.

The passengers were for the most part British officials in the Indian service, the most prominent being Judge Oldfield of the Indian High Court.

Only one of the crew of the Empress of Port William was drowned.

Up to midnight the bodies landed from the Maloja include eighteen men, eleven women and four children, in addition to eleven Lascars. Among the dead is Mrs. McLeod, wife of Gen. McLeod.

It was about 10:30 in the morning that the disaster occurred. The Maloja was steaming down the channel, children playing on the deck and most of the passengers carrying life belts in their hands. Suddenly a terrific explosion blew in the side of the second deck and twenty minutes later the Maloja sank.

Just before she went to the bottom the vessel turned turtle and for a few seconds the keel was visible above the surface. According to eyewitnesses there was a second explosion and while under the water the vessel heaved herself; the masts became visible and then she went down. The captain and officers stuck by the ship to the last. Though all were saved, not one of them left the ship in the boats; they were all picked out of the water.

The captain from the bridge directed the lowering of the boats and called to everybody to keep calm and everybody kept calm wonderfully.

Several children were blown to pieces and the deck was covered with wreckage and wounded, but there was no sign of a panic.

Only a few boats could be lowered and the majority of those saved were on rafts, of which the ship carried a large number. Most of the children were blown to pieces, saved owing to the fact that one boat already in the water drifted under another which was being lowered and

The captain remained on the bridge until thrown into the water by the last stroke of the ship.

THOUSANDS WITNESS RESCUE.

Thousands of the inhabitants of Dover witnessed the rescue work from shore. A considerable number actually saw the blowing up of the ship, and almost the entire population reached the waterfront before the vessel went down. Just before the Maloja sank, a second ship, the Empress of Port William, being lost under exactly similar conditions.

Capt. Shepherd of the Empress bore a remarkable resemblance to the Maloja, and his place in Whitehall was taken by Gen. Robertson, brought for that purpose from France, where he had been acting as chief of staff to Marshal Foch. These transfers were announced, and attracted little attention compared to the stir created by the retirement of French in favor of German.

Then the Imperial General Staff was "reorganized," as Asquith told the Commons. The Cabinet secretly transferred the control of military operations, the whole domain of higher strategy, in which Kitchener formerly held absolute sway, to the Imperial General Staff.

The change in administration leaked out when Sir William Robertson began to make radical alterations in the staff and administrative departments of the War Office, replacing elderly dignitaries, who had retired their jobs from Kitchener. This process still goes on.

To understand how cleverly the politicians have engineered matters, the position of Kitchener in the public mind must be recalled. He is an idol set up by the newspapers and the government for the people to worship, and the magic of his name had much to do with the astonishing outpouring of recruits for the British army.

But the munitions middle last spring proved that Kitchener was not omniscient. He had a fourth month of work to do than any man living could have attended to, and the control of munitions, when the coalition government was announced in November, was taken from the War Office and turned over to Lloyd George.

After that, criticism of Kitchener's strategy became rampant. In sending out reinforcements which if dispatched in time could have won the Dardanelles. The appointment of elderly, well-meaning generals without experience in this war to important commands resulted in the Suvla muddle, in disasters in other theaters of war, and in the coalition government.

Kitchener. Finally, the administrative muddling at the War Office has been said to be the unwillingness of Kitchener to dismiss able army staff bureaucrats who occupied soft berths with dignity in peace time, but were totally unable to take control of the enormous war effort.

Some or all of these criticisms against Kitchener may be unfair, or may be totally unfounded. But they have all been used to strengthen the case for his removal.

NORTHCLIFFE'S ATTACK.

Lloyd George and Lord Curzon, in the Cabinet, backed by Lord Northcliffe and his powerful newspapers, the Times and the Daily Mail, commenced the underground campaign in the House of Commons to remove Kitchener. The campaign was conducted in a way which resulted in the Northcliffe papers being burned all over the country for the plotters to lie low. The explosion of public opinion when it was fully announced in November that Kitchener had been ousted just after he left for the East was the result of this campaign.

POWER OF KITCHENER IS
GIVEN TO ROBERTSON.Former Footman Assumes Command of
Great Britain's Huge Army.First Self-made Man to Rise from the Ranks is Now in
Control of England's Land Forces—Silent Upheaval is
Accomplished by Politicians, Who Declare British War
Machine is Now Like the Germans.

(SPECIAL FOREIGN CORRESPONDENCE.)

BY JOHN L. BALDERSTON.

LONDON, Feb. 6.—Lord Kitchener is no longer, excepting in name, the supreme head of the British war machine. His place has been taken by Gen. Sir William Robertson, the first "self-made" man to rise from the ranks to the chief command in England. And Robertson rose far from the ranks, for he was a footman as a lad, a fact that makes his present position all the more remarkable.

The facts of a most complicated situation have been compressed about weeks in the clubs, and are now sufficiently clear to permit publication. The shelling of Kitchener has been a masterpiece of that master politician, Herbert Henry Asquith. It has been effected without infringing the public, which idolizes "K. of K.," and still believes that the "intrigue of the politicians" against the hero has been foiled.

HOW IT WAS DONE.

The transference of power was carried out simply and quietly. The chief of the almost-powerless Imperial General Staff, Lord Curzon, was sent to Egypt to command the army mulling along the Nile, and his place in Whitehall was taken by Gen. Robertson, brought for that purpose from France, where he had been acting as chief of staff to Marshal Foch. These transfers were announced, and attracted little attention compared to the stir created by the retirement of French in favor of German.

Then the Imperial General Staff was "reorganized," as Asquith told the Commons. The Cabinet secretly transferred the control of military operations, the whole domain of higher strategy, in which Kitchener formerly held absolute sway, to the Imperial General Staff.

The change in administration leaked out when Sir William Robertson began to make radical alterations in the staff and administrative departments of the War Office, replacing elderly dignitaries, who had retired their jobs from Kitchener. This process still goes on.

PUBLIC MONEY
IS WASTED.

Printing Bills of Congress are
Nothing Short of Scandal.

Idiotic Slush Published for
"Home Consumption."

Members of Both Houses Held
Equally Guilty.

BY HARRY CARR.
(SPECIAL CORRESPONDENCE.)

WASHINGTON BUREAU OF THE
TIMES, Feb. 27.—Senator Smoot

called the enemy the other day in the
Senate when he stood up and read for

nearly an hour a speech once delivered
by Senator Root, to the Senators.

If he had asked permission to have
a printed in the record without read-

ing half the Democrats in the Senate
would have objected.

They are itching to get even with
him for having stopped their printing

of editorials from the "home
paper." One of the softest ways of

squaring yourself in the Senate is
to have printed the editorials of

your home town editor, thus flatter-
ing the editor and giving the govern-

ment some enormous printing bills
to pay.

Senator Smoot, as a member of the
Committee on Printing, has consti-

tuted himself watch dog of the govern-
ment printing shop.

Members put pieces from the home
papers in the record from the House

by the yard and cord, but every time
a Senator asks to have the bright re-

marks of his home paper printed, the
bill of Senator Smoot unfolds itself

and he rises as belligerent as an
angry steer.

ALWAYS ON THE JOB.
The Senator from Utah has such a

passion for keeping down printing
bills that he seldom leaves the Senate.

He brings his private secretary over
to the Senate chamber and dictates his

private correspondence to him on one
of the leather seats that line the

chamber.

But he is ever so engrossed in his
letter writing, that the Senator can

hear the softest murmur that sounds
like printing bills and leaps up with

a look of protest.

Consequently, when he had to get
Senator Root's speech into the record

some old way, the Democrats licked
their lips at the chance to get even

with him. But Mr. Smoot got up and
read the whole thing aloud as part of

his speech. And there is no closure in
the Senate. A Senator can talk till

kingdom come if he wants to and read
whatever he likes.

MONEY WASTED.
Some day, when the people of this

country come to realize how their
money is being wasted, in printing

WAR ON WILSON
IS DYING OUT.

Senators and Representatives
Have Got Enough.

Both Houses to Get Down to
Legislative Work.

Determined Fight to be Made
on Conservation Bills.

(BY A. P. NIGHT WIRE.)
WASHINGTON, Feb. 27.—Legisla-

tive business will be resumed in regu-
lar order at the Capitol this week

after the recent flurry over interna-
tional affairs that demoralized the

work of Congress. In both houses
administration leaders have held in

control the threatened revolt against
the President on the armed ship in-

terests, so no further thrust is ex-
pected unless there should be a de-

velopment apparently leading toward
war.

Leaders of the agitation for action
to warn Americans of belligerent

merchants carrying arms admit
there is no chance to get legislation

on the subject. Senator Clegg, a
thor of the warning resolution in the

Senate, has publicly declared that
there is no desire to stay the hand of

the President in diplomatic negotia-
tions. He also says the real purpose

of his resolution already had been
accomplished and this is regarded by

administration leaders as an abandon-
ment of the effort to force the

issue in either house.

CONSERVATION BATTLE.
Conservation champions in the

Senate plan to throw their combined
strength against the Shields bill to

provide for leasing of water power
sites on navigable waters to private

interests. Tomorrow Senator Husting
of Wisconsin, who has had co-opera-

tion of other Senators, will propose
a substitute to the Shields bill with

regulatory features which he declares
will safeguard the public interest and

prevent monopolization of water
power facilities.

Senator Norris of Nebraska charged
in the Senate Saturday that the

strongest lobby the Capitol has seen
in many years is here in the interests

of the Shields bill and that it is com-
posed of representatives of the water

power trust "which has its headquar-
ters in Wall street."

AVIATION INQUIRY.
As soon as an opportunity is offered,

Senator Robinson of Arkansas, will
make an effort to have passed his

resolution providing for an inquiry
into the aviation service of the army,

against which he has filed serious
charges of inefficiency. Little oppo-

sition to passage of the resolution has
appeared in the Senate and the House

is expected to agree to the resolution
when it reaches it.

AUSTRALIAN RECRUITS
RESENT DISCIPLINE.

(A. P. FOREIGN CORRESPONDENCE.)
SYDNEY (Australia) Jan. 21.—The

military authorities are having an
increasingly difficult task in preserv-

ing discipline among the Australian
recruits. There have been a number

of outbreaks by soldiers, resulting in
the burning of tents, the stealing of

groceries and the destruction of saloons
in Sydney and Newcastle, and refusal

among soldiers en masse to pay their
fines on the state-owned railroads.

The Liverpool camp, twenty-five
miles from Sydney, being much the

largest and most important one in the
state, is chiefly affected. There may

be seen the ineptitudes, shortcomings
and abuses which spring from an un-

prepared nation being suddenly
called upon to cope with the mobiliza-

tion, care and preparation of volunteer
armies.

Scores of instances of the demo-
cratic spirit of the recruits at Liver-

pool—especially those from the
"bush"—could be given to illustrate

the problems facing the military
authorities. One of the most striking

was the case of a recruit, who was
strapping "rookie," wishing to ask a

question of an officer, who was about
100 yards ahead of him, whistled

loudly in typical country manner and
then yelled, "Hey!" The officer natu-

rally believed that he was wanted on
some important business walked rap-

idly back to the man who had hailed
him.

"I say old chap," the recruit began,
"propping himself against a post, 'I

say 'no' while you're here sergeant
you haven't been taught yet, but al-

ways remember in future that before
speaking to an officer you should

stand at attention." The officer crit-

ically and then turning on his heel
remarked:

"Well, if that's the way you're go-

ing to take it I won't bother asking
you any questions."

Another raw recruit digging a trench
was accosted by an officer who hap-

pened not to have his sword belt on.
"Hard at it!" the officer asked.

"My oath mate," the man's re-

ply, "but while you're here sergeant
can you tell a chap the difference be-

tween all these officers I see knocking
around here? I don't know one bloke from

another."

"Well, to start with," said the of-

ficer, "I'm not a sergeant."

"No."

"Well, I don't know what you call

TO REORGANIZE
FRISCO SYSTEM.

New Corporation is Formed by
New York Bankers.

Capital Put at Four Hundred
and Fifty Millions.

Both Preferred and Common
Stock to be Issued.

(BY A. P. NIGHT WIRE.)
NEW YORK, Feb. 27.—A new cor-

poration with an authorized capital of
\$450,000,000 and bond issues ag-

gregating \$400,000,000, will be formed
to take over the St. Louis and San

Francisco Railroad Company, accord-

ing to official announcement made
here today by the bankers designated

as the reorganization managers.
The plan, it was said, provides for

the sale of the old company's prop-
erties under foreclosure of the re-

funding or general lien mortgage, or
both. It also embraces terms on

which some of the securities of the
new company will be given in ex-

change for those of the old corpora-

tion, while others will be sold to a
purchase syndicate. The stock and

bonds under the reorganization plan
will be divided as follows: \$250,-

\$100,000 prior lien bonds; \$250,-
000 cumulative adjustment bonds;

\$200,000,000 noncumulative preferred
stock and \$250,000,000 common stock.

Both the preferred and common
stock of the new company will be

held by a voting trust for a period of
five years. The trustees will be

Frederick W. Allen, James W. Lusk,
Charles H. Sabin, James Speyer,

Frederick H. Strauss, Eugene V. R.
Thayer and Festus J. Wade.

LYMAN STILL IN JAIL.
Get-rich-quick Artist Anxious to Re-

turn to California.
(BY A. P. NIGHT WIRE.)

TAMPA (Fla.) Feb. 27.—John
Grant Lyman, wanted in New York

for alleged misuse of the mails,
which netted him more than \$300,-

000, remained in jail here tonight,
while Federal authorities awaited in-

structions from Washington as to
what to do with him.

Lyman insists he should serve out
a fifteen month sentence in prison

in California for operations similar to
those attributed to him in New York

and objects to returning to the latter
state.

STUDY OF GERMAN
DROPPED IN FRANCE.

(A. P. FOREIGN CORRESPONDENCE.)
PARIS, Feb. 12.—French school

authorities have been conducting an
inquiry as to whether the study of

German should be continued in the
high schools. It appears that 50 per

cent of the students who formerly
took German have abandoned this

study in favor of English.

English, however, should not, it is
felt, have the whole benefit of this

change. A commission which is pro-
moting commercial relations between

France and Russia, in fact, has for-
mally requested the government that

Russian should be included in the
curriculum of the high schools. Var-

ious chambers of commerce have in-
cluded Russian in the commercial

schools they control; now the munic-
ipal schools are doing the same.

Though Russian is reputed as one
of the hardest languages, it is urged

that there are compensating facilities.
For instance, Russian syntax is more

akin to the French than is the Ger-
man, and the use of the language is

confined to only one form of each of
the three, and the unity of Russian vocab-

ulary makes it possible for him who
has some knowledge of the language

to be easily understood in all parts of
the empire.

Subterranean schools have been
founded in the war zone by M. For-

sant, a school inspector. These schools
which continue the usual studies, are

situated in a district which has been
frequently under fire, so much so, that

postmen are even forbidden to dis-
tribute mail at some of them.

In spite of this fact, these institutions
continue to give excellent results.

Last year, in this district out of 715
pupils (the normal number) 498 were

being taught in these cellar schools
and twenty-eight received their di-

plomas, of which number thirteen
were girls. As nearly all the school-

masters are mobilized, the work is
carried on for the most part by women

teachers who risk their lives four
times a day by passing through the

streets, where few houses now remain
intact, in order to attend their classes.

The names of these subterranean
schools are significant of the period

in which they were created. There is
the "Joffre School," subdivided into

the classes "Foch," "Sarrail" and
"Albert I." The other schools bear the

names of the generals Manoury, Du-

ball and Garibaldi.

PAYS DEARLY FOR
NIGHT OF SPORT.

(LOCAL CORRESPONDENCE.)
SAN GABRIEL, Feb. 27.—Manuel

Hers, a Mexican laborer, generally
comes home at night for his supper,

but sometimes on pay days he fails
to show up before Sunday. Saturday

was pay day on the Pacific Electric
section, where Manuel works, so his

wife thought that if her husband re-
mained out "with the boys" again she

would even things up by having a
little joke all to herself.

Mrs. Hers placed a bucket filled
with rocks over the front door of her

home with a rope fastened to the
bottom, which would precipitate the

load at the slightest touch.

Manuel came home about 2 a.m.,
according to the wife and neighbors,

and the bucket of rocks struck him
and he tumbled into the door.

Manuel is suffering from a crushed
skull, but will live, says the doctor.

PALE WIVES AND MOTHERS

Many women who had a good color in their girlhood grow pale and colorless when they become wives and mothers.

When the fading-color in cheeks and lips is accompanied by a loss of brightness in the eyes and an increasing heaviness in the steps, the cause is to be sought in the state of the blood.

A hundred causes may contribute to the condition of thin blood thus known as anemia. Overwork, lack of outdoor exercise, insufficient rest and sleep, improper diet, these are a few of them. The important thing is to restore the blood to normal, to build it up so that the color will return to cheeks and lips, the brightness to the eyes and lightness to the step.

Dr. Williams' Pink Pills are the great blood builder and invigorator. They begin at once to increase the red corpuscles in the blood and the new blood carries strength and health to every part of the body. Appetite increases, digestion becomes more perfect, energy and ambition return.

A pamphlet, "Building Up the Blood," will be sent on request by the Dr. Williams' Medicine Co., Schenectady, N. Y. If you mention this paper. Your own druggist sells Dr. Williams' Pink Pills and they will be sent by mail on receipt of price, 50 cents per box, six boxes, \$2.50.

TRY TO KNIFE THE PRESIDENT.

Clark and Kitchin Lead the Revolt Against Wilson.

Democrats in Bad Hole as Result of the Split.

Executive Expected to Force Showdown in House.

BY JOHN CALHAN O'LAUGHLIN.
WASHINGTON, Feb. 27.—A situation of extreme gravity for the Democratic party has developed as a result of the recent split in Congress in connection with the President's policy toward the Teutonic powers.

Mr. Wilson is highly indignant, according to his advisers, not so much because of the political effect of the criticism to which he has been subjected by members of his own party but because of the international consequences flowing from evidences of division in the American government. The President believes that politically he derived personal benefit from the strong stand he took against the men who sought to jam through Congress a resolution forbidding American travel on belligerent ships.

So strong is this belief which is shared by his political advisers, that it is known the administration is giving serious consideration to the idea of forcing a test in the House on the very question which provoked the eruption. In other words the Democratic representatives may be compelled to go on record by their votes.

Portland, Oregon

The mere statement of the situation that exists is sufficient to amaze the presence of a real split among the leaders of the party. If the test should be made and the President should win, undoubtedly the administration's supporters would agitate for a caucus to take the office of leader away from Kitchin. Whether any move would be made against Mr. Clark is doubtful.

WILSON THE STRANGER.
"It is regrettable that an incident of this kind should have occurred," said a close friend of the President tonight. "Nothing could have been more reprehensible than an attempt to discredit the President at the moment when the issue of peace and the trembling in the balance, and the division, there should have been displayed absolute unity. But for purposes of party politics, certain leaders sought to force the passage of the anti-ship armament bill. The President, for the country's sake as well as his own, must know where he stands with Congress. That a resolution which he opposed will be beaten is a good thing for the nation and for every one concerned to drive into the open the men who are so un-American to hamper the President in a delicate situation. That Mr. Wilson would win in such a test I am convinced. He is far stronger than his party, and his party and his party will recognize the fact more and more as the campaign goes on."

Oil Pipe Lines ARE DENOUNCED.

Federal Trade Board Files its Report with the Senate.

Declares Independents are Excluded by High Rates.

Recommends Standard be Declared Common Carrier.

(BY A. P. NIGHT WIRE.)
WASHINGTON, Feb. 27.—A charge that petroleum pipe line companies of the midcontinent field, through high tariffs and unreasonable shipping requirements, have excluded independent shippers from their lines was made today by the Federal Trade Commission in its report to the Senate on a special investigation of the business.

If the five systems that control the midcontinent pipe lines charged their own shippers for carrying oil to the independents, the report declares, their annual net earnings should show a 41.5 per cent. profit on their pipe line investments. As it is they are declared to get cheaper transportation by the use of their own lines.

The investigation was ordered by the last Congress, which later directed an Interstate Commerce Commission inquiry. To avoid duplication the trade commission confined its work to the midcontinent field, while the commerce commission turned its attention to systems operating in the East.

THE FINDINGS.
The report summarizes its findings in this language: "The dominant position of the midcontinent field makes the facts developed in this report of vital importance to the entire country. The 'fixed investment in pipe lines is extensive and corresponds closely with the actual production of oil. Pipe line construction in the midcontinent field has followed, instead of increasing, as in some markets, and such investment is comparatively secure."

"There is a large difference between the cost of pipe line transportation which is very low, and pipe line tariff rates, while the independent shippers are forced to pay rates because their rates are still higher."

"The pipe line companies require large minimum shipments, which make it impracticable for small producers or refiners to ship crude oil by pipe line."

"The price of crude oil delivered at the refineries is, to a large extent, made up of the transportation charge. The cost of a pipe line construction is so great that small concerns cannot build lines from the midcontinent field to the large consuming and distributing centers."

"Lower pipe line rates and smaller minimum shipments are necessary to enable small concerns to compete with large refineries affiliated with pipe line companies."

"Reasonable and equitable conditions of shipment by pipe line would tend to a greater equality in the prices of midcontinent and Appalachian crude oil and in the prices of refined products in different markets."

Of the five large systems operating in the field the commission found that two belong to the Standard Oil Company, and that a third is controlled by Standard Oil of California. The Standard Oil lines are given as the Pacific, running northeast to Illinois and Indiana; the Oklahoma-Louisiana, running southeast to Baton Rouge, and the Magnolia, running south to Texas points. The others are the Gulf and Texas systems.

STANDARD METHODS.
Of Standard Oil methods the report said: "The advantage which the Standard Oil group derives from the exclusive use of the only trunk line from the midcontinent field to the East would be largely removed if this pipe line were made a common carrier in fact as well as in name."

It is explained that though Congress has declared pipe lines common carriers, their use has been made of them as such, as the small refiners almost without exception buy their crude petroleum locally. The Interstate Commerce Commission has not yet passed on tariffs and requirements submitted by the pipe lines, because it has not completed its investigation into pipe line conditions.

"While the Standard Oil interests have in this field some lines which show relatively high costs," the report adds, "nevertheless their chief line running northeast to Chicago excels all others in capacity and in the extent to which that capacity is used. This line shows the lowest cost. This favorable situation is partly due to the fact that there is no other line running to points east of the Mississippi. As all the connecting trunk pipe lines between this river and the Appalachian mountains are controlled by the Standard Oil group, and independent refineries are small and scattered, other pipe lines are not attempted to run their lines to the East, but have built them to the Gulf of Mexico, where they are used in the principal consuming districts."

BIG PROFITS.
The report has this to say of pipe line profits: "The net earnings, before deducting bond interest, of the companies which operate the five pipe line systems in the midcontinent field have been 19.33 per cent. on the net investment for the three-year period, 1911 to 1913. These net earnings, however, do not show what they earned from pipe line operations because in most cases these companies are engaged in other branches of the oil business such as producing, refining and marketing, and their pipe line earnings are reported merely as departments of this integrated form of business. These companies normally treat their earnings as though they arose entirely from merchandising oil, because they as yet have not, to any significant extent, performed the duty of common carriers."

The significance of pipe line rates is best appreciated by showing the rate of return on investment which would be obtained if all the oil shipped by the interests owning the pipe lines were charged the tariff rates at which the pipe line offers to take the oil of other shippers. Taking all these five pipe lines together the net investment aggregated in 1913 \$42,857,000; the cost of transportation by pipe line, including depreciation on investment, \$10,634,000; and the gross receipts which would have been obtained if tariff rates had been charged on all the oil carried, \$28,837,000. On this basis the earnings would have been \$18,203,000 and the rate of return on the net investment 41.5 per cent. The variation in net earnings for the five different systems would have been considerable, ranging from 14 to 62 per cent."

The report goes into minimum quantity requirements of the pipe lines, which, it charges, exclude smaller concerns. "Conditions made regarding the minimum quantity which will be accepted for shipment," it says, "are such that the small oil producer or refiner is virtually precluded from using this method of transportation. The Prairie Pipe Line Company makes the minimum requirement 100,000 barrels; certain others require at least 25,000. It is evident, therefore, that a minimum requirement of 100,000 barrels is not necessary. But a minimum requirement of 25,000 would appear to be excessive."

"The really difficult problem for pipe lines acting as common carriers would appear to arise when the shipments offered exceed the capacity of the line, and in that case some equitable rule would have to be determined for apportioning shipments. Furthermore, there is no opportunity to get cheaper transportation by means, because the rail rates are higher still."

Oil Pipe Lines ARE DENOUNCED.

Federal Trade Board Files its Report with the Senate.

Declares Independents are Excluded by High Rates.

Recommends Standard be Declared Common Carrier.

(BY A. P. NIGHT WIRE.)
WASHINGTON, Feb. 27.—A charge that petroleum pipe line companies of the midcontinent field, through high tariffs and unreasonable shipping requirements, have excluded independent shippers from their lines was made today by the Federal Trade Commission in its report to the Senate on a special investigation of the business.

If the five systems that control the midcontinent pipe lines charged their own shippers for carrying oil to the independents, the report declares, their annual net earnings should show a 41.5 per cent. profit on their pipe line investments. As it is they are declared to get cheaper transportation by the use of their own lines.

The investigation was ordered by the last Congress, which later directed an Interstate Commerce Commission inquiry. To avoid duplication the trade commission confined its work to the midcontinent field, while the commerce commission turned its attention to systems operating in the East.

THE FINDINGS.
The report summarizes its findings in this language: "The dominant position of the midcontinent field makes the facts developed in this report of vital importance to the entire country. The 'fixed investment in pipe lines is extensive and corresponds closely with the actual production of oil. Pipe line construction in the midcontinent field has followed, instead of increasing, as in some markets, and such investment is comparatively secure."

"There is a large difference between the cost of pipe line transportation which is very low, and pipe line tariff rates, while the independent shippers are forced to pay rates because their rates are still higher."

"The pipe line companies require large minimum shipments, which make it impracticable for small producers or refiners to ship crude oil by pipe line."

"The price of crude oil delivered at the refineries is, to a large extent, made up of the transportation charge. The cost of a pipe line construction is so great that small concerns cannot build lines from the midcontinent field to the large consuming and distributing centers."

"Lower pipe line rates and smaller minimum shipments are necessary to enable small concerns to compete with large refineries affiliated with pipe line companies."

"Reasonable and equitable conditions of shipment by pipe line would tend to a greater equality in the prices of midcontinent and Appalachian crude oil and in the prices of refined products in different markets."

Of the five large systems operating in the field the commission found that two belong to the Standard Oil Company, and that a third is controlled by Standard Oil of California. The Standard Oil lines are given as the Pacific, running northeast to Illinois and Indiana; the Oklahoma-Louisiana, running southeast to Baton Rouge, and the Magnolia, running south to Texas points. The others are the Gulf and Texas systems.

STANDARD METHODS.
Of Standard Oil methods the report said: "The advantage which the Standard Oil group derives from the exclusive use of the only trunk line from the midcontinent field to the East would be largely removed if this pipe line were made a common carrier in fact as well as in name."

It is explained that though Congress has declared pipe lines common carriers, their use has been made of them as such, as the small refiners almost without exception buy their crude petroleum locally. The Interstate Commerce Commission has not yet passed on tariffs and requirements submitted by the pipe lines, because it has not completed its investigation into pipe line conditions.

"While the Standard Oil interests have in this field some lines which show relatively high costs," the report adds, "nevertheless their chief line running northeast to Chicago excels all others in capacity and in the extent to which that capacity is used. This line shows the lowest cost. This favorable situation is partly due to the fact that there is no other line running to points east of the Mississippi. As all the connecting trunk pipe lines between this river and the Appalachian mountains are controlled by the Standard Oil group, and independent refineries are small and scattered, other pipe lines are not attempted to run their lines to the East, but have built them to the Gulf of Mexico, where they are used in the principal consuming districts."

BIG PROFITS.
The report has this to say of pipe line profits: "The net earnings, before deducting bond interest, of the companies which operate the five pipe line systems in the midcontinent field have been 19.33 per cent. on the net investment for the three-year period, 1911 to 1913. These net earnings, however, do not show what they earned from pipe line operations because in most cases these companies are engaged in other branches of the oil business such as producing, refining and marketing, and their pipe line earnings are reported merely as departments of this integrated form of business. These companies normally treat their earnings as though they arose entirely from merchandising oil, because they as yet have not, to any significant extent, performed the duty of common carriers."

The significance of pipe line rates is best appreciated by showing the rate of return on investment which would be obtained if all the oil shipped by the interests owning the pipe lines were charged the tariff rates at which the pipe line offers to take the oil of other shippers. Taking all these five pipe lines together the net investment aggregated in 1913 \$42,857,000; the cost of transportation by pipe line, including depreciation on investment, \$10,634,000; and the gross receipts which would have been obtained if tariff rates had been charged on all the oil carried, \$28,837,000. On this basis the earnings would have been \$18,203,000 and the rate of return on the net investment 41.5 per cent. The variation in net earnings for the five different systems would have been considerable, ranging from 14 to 62 per cent."

"The really difficult problem for pipe lines acting as common carriers would appear to arise when the shipments offered exceed the capacity of the line, and in that case some equitable rule would have to be determined for apportioning shipments. Furthermore, there is no opportunity to get cheaper transportation by means, because the rail rates are higher still."

FIVE FREED FROM PRISON

Defendants in Bartol Case Granted Paroles.

Officials Believe All Victims Miscarriage of Justice.

Conviction of Prisoners Used in Impeachment.

(BY A. P. NIGHT WIRE.)
SAN QUENTIN, Feb. 27.—Three men sentenced to the San Quentin Penitentiary for the murder of John L. Clinton, Superior Judge John L. Clinton, three years ago for mistreatment of the 11-year-old daughter of Mrs. Clinton, were all released on parole by the Board of Prison Directors, James A. Johnston, warden of San Quentin prison, announced today based its action on the fact that the prisoners had been the time of a miscarriage of justice.

Those released were: Mrs. Bartol, sentenced to three years; Mrs. Josie Horn, from 1911; Orville Taggart and Otto Clinton, each, all in San Quentin for years each, sentenced to three years in Folsom prison.

The conviction of these prisoners figured at the last regular session of the State Legislature in the proceedings for the impeachment of Judge Childs, who was charged, among other things, with having influenced the testimony of May Bartol against her mother and the other defendants. The impeachment proceedings were dismissed on the report of the Senate Committee that Judge Childs had been proved guilty of irregularities, the evidence did not warrant his removal from office.

May Bartol was the star witness during the hearing of the impeachment charges, having been brought from Montana to testify. She was the only woman on the stand. The impeachment committee, which was related to juries in San Quentin when her mother, Mrs. Bartol, and the other men were sentenced by virtue of her testimony. Appeals from the convictions were filed by the higher courts.

AIRMAN BOMBARD BLEYBERG TUNNEL

BY ATLANTIC CABLE AND A. P. AMSTERDAM (via London), Feb. 27.—Allied airmen have attacked and destroyed the railway station tunnel at Bleyberg, near the Echo Belge.

Amateurs and Professionals Mingle in Santa Barbara Golf Tournament

SANTA BARBARA TOURNAMENT ON

Opening Round of Open Meet Commences Today.

Local Amateurs and Pros are Among Entries.

Midwick and Altadena Keep up a Hot Pace.

BY ALMA WHITAKER.
The open golf tournament begins at Santa Barbara today and most of the local professionals and many amateurs have gone up for it. There will be thirty-six holes today and another thirty-six tomorrow, with a prize for the six best pros, and a gold medal for the best amateur.

The amateur invitation tourney opens on Wednesday with a thirty-six-hole qualifying round—quite a championship event. It closes on Saturday with thirty-six-hole finals for all clubs. There is also to be an exhibition match on Friday between C. C. Adams, the local professional, and James Smith, against the two leading professionals in the open tournament, for a purse.

Master Greenwood.
The Greenwood Country Club has really materialized and intends giving a house warming at the end of this month. A house already on the course has been made over into a comfortable clubhouse for temporary use until the new one is built, and nine holes of the course are already in good shape for play. "And a rattling good nine holes, too," as its sponsors declare with infinite enthusiasm.

Women Players.
The women's invitation tournament at Annandale begins today and the eighteen-hole qualifying round may be played either morning or afternoon. Mrs. Henry Van Dyke is in charge of the tournament, and most of the prominent women golfers have entered.

The rain soon runs off the course at Annandale, so unless another storm intervenes, the links will be in good playable condition.

Rich for Midwick.
With the four matches played on Saturday, Midwick retains her place at the head of the scratch, for although her percentage is the same, she has five matches to her credit against her three.

Altadena's defeat at the hands of Redlands still leaves her head of the handicap list, but has modified her radiant transports a trifle. But they can take comfort from the fact that even a star team can get itself licked by Redlands on the Redlands course. Here are the ratings to date:

Club	Scratch	Handicap	Winnings
Altadena	1	10	100
Redlands	2	10	100
Midwick	3	10	100
San Marcos	4	10	100
San Juan Capistrano	5	10	100
San Clemente	6	10	100
San Juan del Rey	7	10	100
San Marcos	8	10	100
San Juan Capistrano	9	10	100
San Clemente	10	10	100
San Juan del Rey	11	10	100
San Marcos	12	10	100

The Women's Championship.
The women's Southern California golf championship will be played at the Midwick Country Club March 21, 22, 23, 24, and 25. They have just sent out their notices on that stylish new association stationery with the blue and gold heraldic design.

There will be an eighteen-hole qualifying round on the afternoon of the 21st, followed by the championship proper on the 22nd, 23rd, 24th and 25th. Mrs. Henry Van Dyke holds the title and she will have four ex-champions to compete against her in Mrs. E. R. Williams, Mrs. Luther Kennett, Mrs. J. V. Elliot and Mrs. Robert Pittman.

The mixed foursome event, which usually winds up the tournament, will be held on the second day this year, March 22, in the afternoon, after the first round match play.

The finals will be played on Saturday, the 25th—11 holes.

There is an interesting small wee wee at the bottom of the announcement to the effect that "Players not affiliated with any club in the association may compete in the men's event upon invitation of the president." This is also the case for the men's championship and is an auspicious ruling passed at the big association meeting to obviate any little awkward contretemps, as that which happened last year when Robin Hayne and Jack Xerille came down from San Francisco to compete in the men's event. Our distinguished visitors must be positively made welcome and the rules be bowed.

FRESNO BANTAMS BEAT OLYMPICS.

[BY A. P. MORGAN WIRE.]
FRESNO, Feb. 26.—Fresno's playground basketball team won the 110-pound weight championship of the state here today, defeating the 110-pound five of the Olympic Club of San Francisco, 56 to 41. The Fresno Y.M.C.A. 145-pound team was beaten in the first lap for the state championship by the 145-pound team of the Berkeley Y.M.C.A. 40 to 25.

RAIN PUTS END TO CLUBMEN'S HIKE.

Dan McLeod and Nye Williams were to lead a bunch of hikers from the L.A.A.C. up Mt. Wilson and back yesterday, but did not. When the rain began coming down Saturday night Nye and Dan held a hasty consultation that resulted in Gene calling up all of the hikers and telling them to stay in bed Sunday morning.

Capt. Bud Story.

Of the brand new Altadena Country Club golf team. Bud's team leads the league in the handicap standings and expects to continue in that proud position at the head of the column.

By Whitaker.

THREE STATE BASKETBALL TITLES ARE SOUGHT FOR.

WHITTIER High School is out with a deft. The 110-pound basketball team of that school wants to play the Fresno Playgrounds for the championship of the State. The midgets from Whittier were easily the class of the South in basketball. For its size the team is really a remarkable one. From all reports Fresno has a fast playing quintette. The team had no trouble cleaning up every other midget team in the north. This will be the third game for a championship wanted by basketball teams in Whittier College. The regular high school team won the interscholastic championship of Southern California and is looking for a game with the winners in the north. The high school team will play San Diego

BIGGEST GAMES ON SAME DAY.

YALE-HARVARD GAME TO VIE WITH ARMY-NAVY.

Popularity of Two Biggest Football Games to be Tested Out When Collegians Play at Yale and Cadets and Middies at Polo Grounds—All Seaford Usually Sold in Advance.

The probability that the Harvard-Yale and Army-Navy football games may be played on the same day next autumn is likely to develop an interesting test of the sport's popularity in the East. According to the present plans the service game will be played at the Polo Grounds on Saturday, November 25. On the same date at New Haven, less than 100 miles away, Yale and Harvard are scheduled to meet in their annual gridiron battle.

The Yale bowl, with temporary seats placed along the wall-top concourse, can accommodate more than 70,000 spectators, and there is not the slightest doubt but that every seat will be occupied. At the Polo Grounds close to 60,000 spectators can be accommodated, so that if both games draw full capacity 120,000 spectators will witness the play. To these figures must be added another 40,000 or 50,000 who will attend minor college or inter-collegiate contests within a radius of 100 miles.

EDDIE COLLINS IS IN DEMAND.

Swamped with Invitations to Make Speeches.

Churches are All After Him as an Orator.

Will Accept a Few Offers to Speak, He Says.

[BY DIRECT WIRE—EXCLUSIVE DISPATCH.]
PHILADELPHIA, Feb. 26.—Eddie Collins's dip into evangelism has had a home run effect among church people throughout the country, and he now is swamped with invitations to address church congregations, Bible classes and Sunday-school meetings.

POPULAR GUY.
The requests have swept in upon him at his home in Lansdowne in such a deluge that he said today he had reached the point where he would have to give up baseball if he were to meet all the engagements asked. He has no ambition to become an evangelist, however, but desires to stick to the diamond.

Eddie, formerly with the Athletics, but now second baseman for the Chicago White Sox, made his debut as a pulpit orator last Sunday, when he addressed the Epworth Methodist Sunday-school at Fairbury, N. J. He supplemented his address with ten rules of life which, he says, mean the health and success of the coming generation.

HIS RULES.
Collins's ten rules for success in life were in part as follows:
(1.) Honor. Boys who waste their time and then earn for examinations will soon forget what they are taught.
(2.) Don't drink alcoholic beverages. Liquids containing alcohol are injurious to mind and body.
(3.) Conservative eating. To be at his best a man must take care of his stomach. The stomach is an important organ, for the brain depends upon its action.
(4.) Learn to be a good loser. Don't brag or offer excuses. The man who is proud of his own work is a man's mental disposition. A smile makes friends. It gives one courage.
(5.) Keep good hours—every man should get the necessary amount of sleep and give his body the proper rest.

(6.) Courage—no matter what happens, always have the courage of your convictions. Do what you think is right wherever you are, and do it unhesitatingly. Connie Mack had the courage of his convictions. He tore his team's record without wavering, and in the face of big opposition.

(7.) Don't think you know it all. This rule is the most absurd of any. A person should never think he has acquired all the knowledge and is beyond learning.

(8.) Promptness. Be on the minute. Never lag back. It is just as easy to be on time as it is to be a few minutes late.

(9.) Think clean thoughts—if a person's mind and conscience is clear of foul things in life he will be true to himself.

MUCH WANTED.
Since breaking in the gospel league, the leading base runner of the American League, Collins has received volumes of mail from ministers, laymen and Bible class teachers, near and far, imploring him to address meetings for them.

"I am gratified to learn that my little talk of last Sunday and my rules of life amounted to something," said Eddie, modestly, today.

"For the past several days Mrs. Collins and I have been kept busy answering the requests and we want to be down in Philadelphia for a report with the White Sox at the training camp in two weeks at Mineral Springs.

IN DEMAND.
"I have received letters from persons all over the country, one writer lives in Washington, and apparently went over the White Sox playing calendar for the coming season and picked out a Sunday when the team will lay over in Washington. On that date I have been requested to address a religious meeting similar to the one I addressed in Palmyra.

"Of course I will accept a few of the invitations, and do the best I can to help out."

SAN PEDRO LOSES HARD-FOUGHT GAME.

[OFFICIAL CORRESPONDENCE.]
LOS ANGELES HARBOR, Feb. 27.—In a hard-fought pitcher's battle the Pacific Electric team defeated the San Pedro Merchants here today in a thirteen-inning game that ended 5 to 3. In the end the ninth, the score stood 2 to 2 in favor of the Pacific Electric team when San Pedro walloped in three runs by good stick work.

Cunningham pitched a great game for San Pedro but weakened in the twelfth inning and was replaced by Empeke. In this inning Dan Meeks and Carlisle for the visitors each got a two-bagger and were brought in by a fly and single.

Cunningham walked five men and Evans eight. Evans did unusually fast work. The score:

Pacific Electric	R. H. E.
San Pedro	5 10 1
Batteries—Evans and Meeks, Cummings, Empeke and Widner.		

There were about 1000 in attendance. This was the last of a series of three games with the Pacific Electric team. The first was a tie game and San Pedro won the second. Next Sunday San Pedro will play Fullerton.

Eddie Collins. Who seems to be making a bigger hit as an evangelist than he has as a ball player.

Burke Injured.

(Continued from First Page.)

for a vantage point and as he released the ball with a quick movement he adroitly hit it after it struck the ground and soon after made a goal.

Malcolm Stevenson, on the Coronado team, played brilliantly throughout and Mal. Ross, at Back, sent many high balls flying, but their team work could not equal that of the Midwick.

The line-up: Midwick, No. 1, Robert Neustadt; No. 2, Hugh Drury; No. 3, R. Wells; back, Carleton Burke. Coronado: No. 1, S. H. Velle; No. 2, Thomas LeBoutillier; No. 3, Malcolm Stevenson; back, Colin G. Ross.

The score: Midwick, goals, Neustadt, 2; Drury, 2; Wells, 4; total goals, 14. Penalties Fleischman (for Burke) foul, Neustadt foul, Wells foul; total fouls, 12; net score, 12-4.

Coronado: Goals, Velle, 1; LeBoutillier, 3; Stevenson, 1; total goals, 5. Penalties, Velle foul, LeBoutillier safety; total penalties, 3; net score, 4-4.

The champion Yale variety eight will have two new shells for use in preliminary and dual races this summer. A new coaching launch has also been donated by several alumni.

Coach Guy Nickalls will again have charge of the Blue crew.

Eddie Mahan, Billy Boles, Wilmet Whitney and Westmore Wilcox of the Harvard variety football team are all candidates for the Crimson pitching staff this year.

"We have some husky boys here," said Coach Guy Nickalls.

Gotch Indignant.

(Continued from First Page.)

ton's Birthday. Gotch was unable to get in condition for that match through no fault of his own. He found it much more difficult to get in shape after his long retirement than he had expected. Also, he didn't have the right accommodations.

It was only the week before the match that he found his old friend Dan McLeod at the L.A.A.C. and just the place he had been looking for. In spite of handball, road work, and what little mat work he could do, he could not round into shape for February 22. As soon as he saw that he could not be right on that date he wired north asking for the postponement.

"I will not wrestle until I'm in condition," he said at that time. "I've always been on the square with the public and they with me. I'm not going to go back on them or fool them now."

He was asked then when he would wrestle Santa. He answered: "I don't know. Just as soon as I am in shape. It is taking much longer than I thought for me to get in condition."

FOLEY TO EXPLAIN.
That was before the rumour in the north. When Foley goes down to the L.A.A.C. this morning, he will be asked to read all the clippings in the San Francisco newspapers and do some explaining.

But whatever becomes of the Santa-Gotch match, the champion is going to wrestle Demetral in this city March 10. The bout will probably be held at the Shrine Auditorium. The club management have about come to the conclusion that the L.A.A.C. gym cannot possibly accommodate the crowd.

Practically every man who likes sport wants to see the wonderful Frank Gotch in action and anxious to see if he can come back.

Demetral, the Greek, has a tremendous following in the city. Every footstep in town will be there to yell for him, besides hundreds of others. He has lost only one match in four years. Dr. Roller defeated him at the L.A.A.C.

MORE ROOM.

"What we need is more seats at popular prices than we can have at the club," explained George Towle. The space here is so small that we would have to charge high prices. By giving it at the Shrine we will be able to have enough seats at popular prices to accommodate all I figure that the man with the small pocket book has as much right to see Gotch as the wealthy fellow."

For the last two weeks Gotch has been rounding into condition. His one complaint is that he has not been able to do enough work. In the mornings he runs the Hollywood hills. In the afternoon he plays handball at the club and wrestles all of the grapplers that come around. But these are few. Most of the wrestlers work until 5 o'clock. At that time Gotch is home smelling the cooking foods his wife is preparing for supper.

"We have some husky boys here," said Coach Guy Nickalls.

The English track and field championships may be revived this year. The games were dropped last year because of the war, but the athletic authorities are of the opinion that conditions are favorable to stage the events. Germany, in the hold a series of contests in the stadium at Berlin built two years ago for the Olympic games, which was scheduled for next July.

THE Dumbest Oyster can make a better pearl than the brightest man. The oyster uses Nature's methods.

Nature's way

WHEN I'm maturin' tobacco for VELVET, I take a page from old Mother Nature's Book.

Nature says smokin' tobacco don't arrive at its full, hearty maturity until after two years' maturin'.

Some folks may say: "Why wait on Nature? We can do it quicker."

I'm strong for Nature's way—the VELVET way—two years' mellowing in big, wooden hogsheads—"ageing in the wood."

What do you say?

Well, fill a pipe with VELVET, an' draw in the cool, mild smoke that's so fragrant an' rich that—but what's the use of tryin' to describe a taste? Take my word for VELVET long enough to try a pipeful, and you won't need to take anybody's word after that.

Nature's way

LANGFORD MAY FIGHT JOHNSON.

(BY DIRECT WIRE—EXCLUSIVE DISPATCH.)
LONDON, Feb. 27.—Langford, ex-heavyweight champion pugilist, who has been ordered to leave England because an undesirable alien, said in an interview at Northampton where he is appearing in a cause entitled, "Second Case," that he is leaving England to fight Sam Langford or Sam Jones in South America.

"It must be one of those things," said Johnson. "You see, Langford Klegin has offered me, on behalf of a syndicate, \$1000 to my end of the purse, including the rights for a fight in South America, and I have accepted. I have to leave London in a hurry today so I do not know just who my opponent is to be. I shall know tomorrow when I meet Klegin to settle details."

Johnson added that he hoped Langford would be his opponent and said: "He's one of the best drawing cards in the country."

As Gotch says, he is human, isn't near as rough with the wrestlers as he ought to be. He is a good. He plays with them a bear with his cuts. He rubs them up a little but usually he lets them around or lets them tell him. That is because he feels that the sport's sake ought to be treated cordingly.

THE HIRELING.
He hired one big moon to see the Spring street. This fellow looked big as an elephant and weighed 250 lbs. Gotch picked the big brute up and threw him across the gym and some potted ferns. The Spring street never showed up again. Then nobody has been seen to wrestle with him for pay since there are a number of volunteers for the sport's sake. Being close to the difference in Gotch's weight has been observed.

The English track and field championships may be revived this year. The games were dropped last year because of the war, but the athletic authorities are of the opinion that conditions are favorable to stage the events. Germany, in the hold a series of contests in the stadium at Berlin built two years ago for the Olympic games, which was scheduled for next July.

CONFIDENCE POMONA.
Think the Baseball Won Alone.

Coach Boles has the Hard Work.

First Game Results played Tuesday.

CLAREMONT, Feb.
Boles has been working on his baseball team for weeks now, and the Huns are round into shape. He has more than a dozen new coaches, and see how they should not walk. Conference championed a man as Coach Boles of their team.

FIRST GAME.
Pomona opened her season with a victory over the Huns, 3 to 2. Both teams had men on the base during the game, when the winning run was scored. The Huns had a lead of 2 to 0 in the first inning, but the team had men on the base during the game, when the winning run was scored.

The Huns were scheduled to play the Huns, 3 to 2. Both teams had men on the base during the game, when the winning run was scored. The Huns had a lead of 2 to 0 in the first inning, but the team had men on the base during the game, when the winning run was scored.

The Huns were scheduled to play the Huns, 3 to 2. Both teams had men on the base during the game, when the winning run was scored. The Huns had a lead of 2 to 0 in the first inning, but the team had men on the base during the game, when the winning run was scored.

Mr. Wad's Shadow Looked Fierce Enough to Iona's Beau, Anyway

By GALE

CONFIDENCE IN POMONA RANKS.

Think the Baseball Title is Won Already.

Coch Bole has the Team at Hard Work.

First Game Results in a Well-played Tie.

CLAREMONT, Feb. 26.—Coach Bole has been working with the Pomona baseball team for almost two weeks now, and the Huns are beginning to round into shape. The Huns are more than satisfied with their new coach, and see no reason why they should not walk off with the conference championship with such a man as Coach Bole at the head of their team.

FIRST GAME. Pomona opened her season with Riverside High School Friday afternoon, and played seven innings to the score, 2 to 2. Both teams played tight ball in the pinches, and while both the varsity and the prep school team had men on base several times during the game, who threatened to score the winning run, neither Coach Bole nor Coach Evans was able to slip across the tally which counted.

Shellenberger and Elliott worked in the box for the Huns the opening game, and both showed unmistakable signs of class. While the High School team hit Shellenberger harder than was expected, he pitched high-class ball in the pinches, and kept the score down to two runs while he was in the box. Elliott pitched shut-out ball for four innings.

COACH BOLE. The Huns were scheduled to meet Riverside High School Saturday, but were prevented from making the trip by the rain. However, they will migrate to Riverside Wednesday afternoon, and play of the postponed game. Riverside is said to have one of the fastest prep school teams in the part of the State this season, with the Indians by the name of Benson in the box, and from all indications, the Huns are in for a close battle in their coming game. Riverside will play a return game at Pomona within the next two weeks.

COACH BOLE has finished the preliminary work with his team, and what he wants now is plenty of practice. For this reason, Manager Bole is working hard to arrange a practice schedule for the Huns, and is having fair success.

THREE OF 'EM. This coming week will see two other ball games in addition to the Riverside game. Pomona High School will meet the Huns again Thursday or Friday afternoon, when the tie of last time will be played off. Coach Evans will bring his prep school team to Claremont once a week from now on till the end of the season, and will ensure the Huns of plenty of practice games. The third game of the week will be played Tuesday, in all probability, with either Chaffee Union or Bonita.

COACH BOLE is working hard to round off the rough edges on his team. He has fashioned a satisfactory infield out of the material he has had to work with, and is at present engaged in teaching his pitchers to work together. With Cree on first, Conley on second, and Capt. Bergstrom on short, the coach has three experienced men to work with, while a new man, makes a first-class showing on third base.

HOLD 'EM DOWN. The Huns lost many ball games last year because the infield tended to blow up at critical points, and the coach is determined to overcome this tendency in his 1916 team.

Bray, Given, Shepherd and Dahlem have been occupying outfield berths. Bray and Given are veterans, and are playing the best ball of their careers. Dahlem has been transferred from the infield, where he played for three years with Chaffee High School, to short field, and has proven to be both a more solid and a heavier hitter. Shepherd will probably be used as a utility man.

The Huns have an experienced team to represent them this coming season. Eight veterans are to be found on the team, and all of them are showing better ball than ever. With an experienced team, and a strong pitching staff, the Huns promise to be more than dangerous in the coming intercollegiate season.

Mathews Inman, champion billiard player of England, defeated George Gray, the Australian crack, in a match of 18,000 points recently concluded in England. Inman won by a margin of 235 points. The contest was for 1800 a side. In a similar match last November in London Gray defeated Inman by 190 points.

Land Stanford co-eds will hold a field day on April 29 in which lawn tennis, aquatic sports, fencing, basketball, volleyball, archery, javelin, throwing and baseball-throwing will be featured.

OLD-TIMERS WILL PLAY FOR A CUP.

UNIQUE TOURNAMENT TO BE PUT ON TODAY.

Guests More than Sixty Years of Age as the Hotel Raymond to Compete for a Silver Trophy on the Hotel Links this Morning in Annual Veterans' Tournament.

Representing more millions than the number of years required for qualification, twenty-old golfers will start in the fourth annual veterans' handicap tournament at the Hotel Raymond Golf Club this morning.

Only guests who have reached or passed the 60th milestone, on life's journey, are qualified to enter the event, which is one of the most unique golf tournaments in the country. The entry list shows the names of men who have amassed good health, and every line of occupation and who are now resting after years of strenuous business life.

The prize for the event will be a handsome cup presented by A. Adler, the winner of the tournament last year, and who will be one of the players in the final round. A medal will be given for the low gross score in the qualifying round and a prize to the runner-up.

A. L. Watson of Worcester, Mass., who was the winner of the first cup offered four years ago, will play again this year, and his friends are betting he will win. Watson, who was formerly president of the Western Suburban, one of the most important street railway lines of Western Massachusetts, is in his 74th year and is as vigorous and active as many a man half his age.

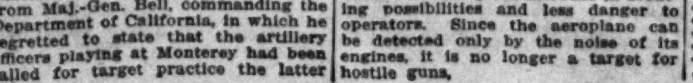

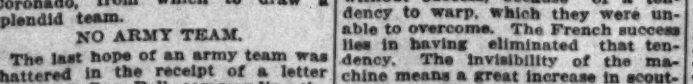

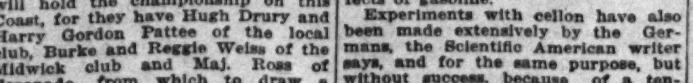

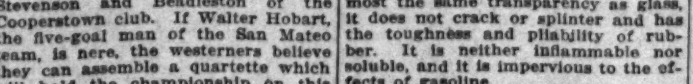

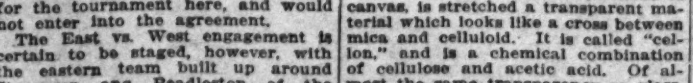

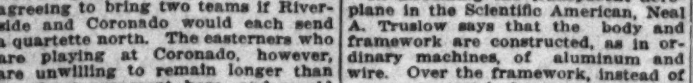

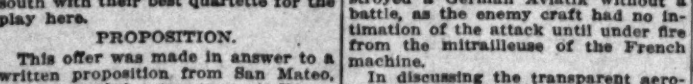

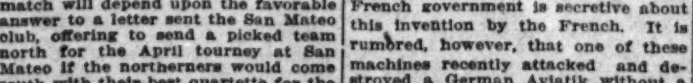

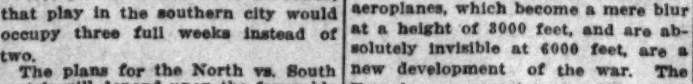

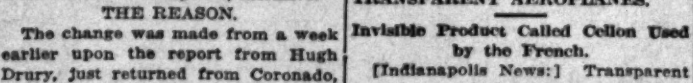

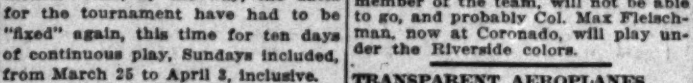

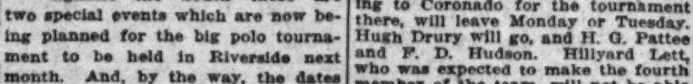

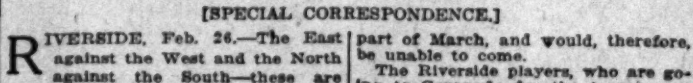

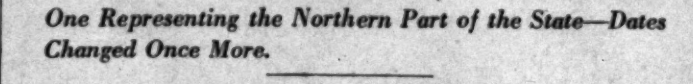

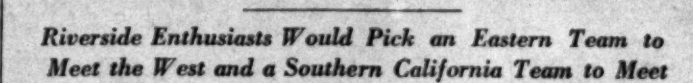

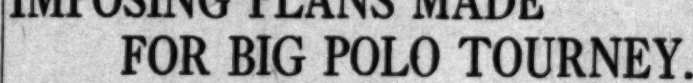

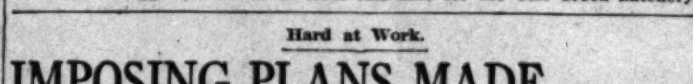

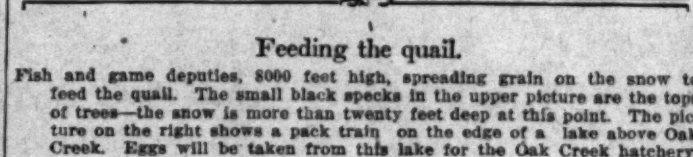

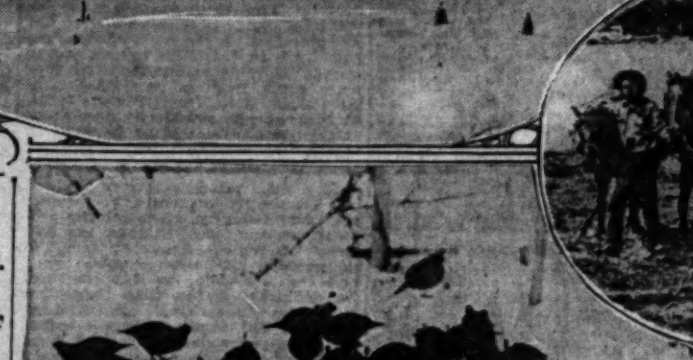

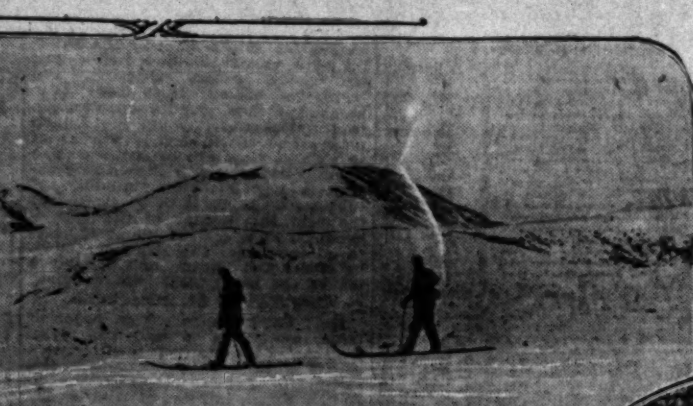

Among the prominent guests of the Raymond who will start in the qualifying rounds today, are A. Adler of the firm of L. Adler and Sons of Rochester, N. Y.; Julius C. Birge, president of the Ames Plow and Shovel Company of St. Louis, and author of "The Awakening of the Desert"; Stillman F. Kelly, retired broker of Cambridge, Mass.; J. F. Pockock of Massillon, O., who was a power in the coal operating field a short while back, but who is now retired from active business; Achille, the well-known clothier of San Francisco; L. I. Aaron, one of the largest glass manufacturers of Pittsburg; Joseph Belfield, president of the Sherman Hotel Company of Chicago; E. L. Watson, retired traction magnate; W. H. Sord of the original Rathbourn-Ward Company of Chicago; A. E. Lang, retired attorney of Windsor, Vt.; T. Hofeller, Buffalo, N. Y.; O. Horwitz of New York, and C. Haas, S. Silberman, M. Born, F. Strausser and M. Schlessinger of Chicago.

L. A. RAILWAY LOSES RIGHT TO BALL TITLE. The Los Angeles Railway team lost all claim to the amateur baseball championship of Southern California yesterday. The Desmond team won the final and deciding game of a series between the two clubs. The score was 7 to 6.

The score was tied until the fatal seventh when Johnny Rees drove in the winning run with a three-bagger. The score:

Desmonds 7 11 3
L. A. Railway 6 10 5
Batteries—Desmond and Dascomb, Haddock, Montgomery and White.

Jim Stansbury, professional champion sculler of Australia, was a recent visitor in San Francisco. Stansbury is working on one of the steamers plying between San Francisco and Sydney and he may show his ability in Pacific Coast rowing races on his next visit.

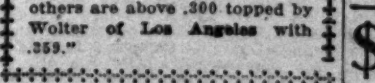

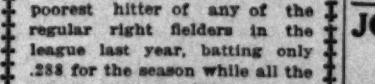

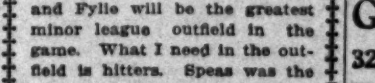

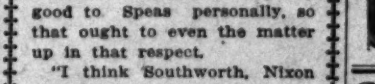

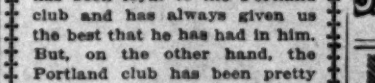

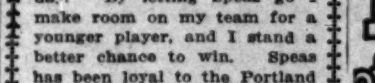

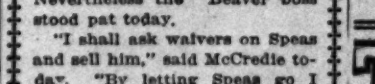

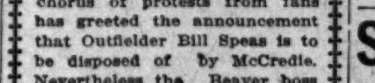

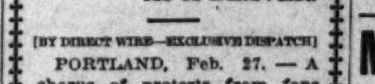

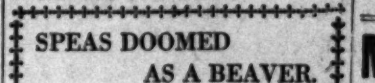

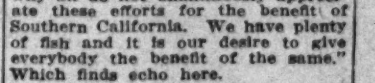

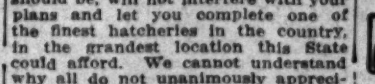

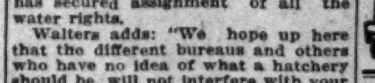

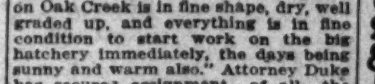

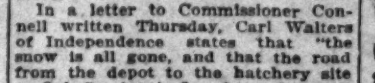

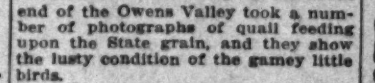

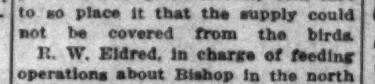

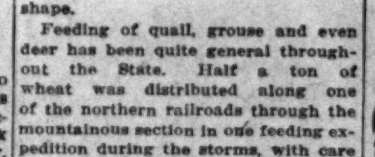

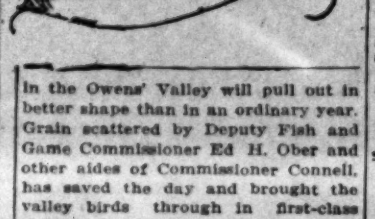

QUAIL ARE WELL TAKEN CARE OF.

GRAIN SPRINKLED ON THE SNOW SAVED THEM.

More than Half a Ton of Feed is Spread Around by Game Deputies and Birds are in Better Condition than Usual—Snow Gone from Hatchery Site in Oak Creek.

Without further snowfall the quail

ICE-SKATING LEAGUE THE LATEST WRINKLE.

The first ice skating league that

Los Angeles, San Francisco and San Diego will be represented. William Schneider, of the Cafe Bristol, will have the local call on the artists to be imported from the East to show westerners the latest novelties in the sport.

The Portola Cafe, San Francisco, and the Grant Hotel, San Diego, make up the league with the Bristol. The league pays the expenses of internationally famous artists from New York, and then divides the thirty weeks' time guaranteed them, interchanging artists every two weeks.

Crowds of Southern Californians who had never before seen an ice surface flooded to the Bristol yesterday to inspect the big rink installed there. It is 26 by 60 feet and the largest ice rink in America.

ICE SKATERS TAKE THEIR FIRST FLING. The wave of ice skating that has been sweeping the East hit Los Angeles yesterday when the new rink at Harlow's Cafe was completed and a coterie of artists demonstrated to interested observers the great winter sport of the colder countries.

This is the first ice rink Los Angeles has ever known, and crowds stood around and gaped in astonishment as the skaters whizzed by on the smooth artificial ice.

Tonight has been set as the formal opening of the Harlow rink. Last night's events were merely tryouts.

In the Owens Valley will pull out in better shape than in an ordinary year. Grain scattered by Game Deputies and Birds are in Better Condition than Usual—Snow Gone from Hatchery Site in Oak Creek.

Feeding of quail, grouse and even deer has been quite general throughout the State. Half a ton of wheat was distributed along one of the northern railroads through the mountainous section in one feeding expedition during the storms, with care to so place it that the supply could not be covered from the birds.

R. W. Eldred, in charge of feeding operations about Bishop in the north end of the Owens Valley took a number of photographs of quail feeding upon the State grain, and they show the luscious condition of the gamey little birds.

In a letter to Commissioner Connell written Thursday, Carl Walters of Independence states that "the snow is all gone, and that the road from the depot to the hatchery site on Oak Creek is in fine shape, dry, well graded up, and everything is in fine condition to start work on the big hatchery immediately, the days being sunny and warm also." Attorney Duke has secured assignment of all the water rights.

Walters adds: "We hope up here that the different bureaus and others who have no idea of what a hatchery should be, will not interfere with your plans and let you complete one of the finest hatcheries in the country. In the grandest location this State could afford. We cannot understand why all do not unanimously appreciate these efforts for the benefit of Southern California. We have plenty of fish and it is our desire to give everybody the benefit of the same."

WHICH FINDS ECHO HERE.

TRANSPARENT AEROPLANES. Invisible Product Called Cellon Used by the French.

(Indianapolis News.) Transparent aeroplanes, which become a mere blur at a height of 3000 feet, and are absolutely invisible at 6000 feet, are a new development of the war. The French government is secretive about this invention by the French. It is rumored, however, that one of these machines recently attacked and destroyed a German Aviatik without a battle, as the enemy craft had no information of the attack until under fire from the mitrailleuse of the French machine.

In discussing the transparent aeroplane in the Scientific American, Neal A. Trueman says that the body and framework are constructed, as in ordinary machines, of aluminum and wire. Over the framework is stretched a canvas, which looks like a cross between mica and celluloid. It is called "cellon," and is a chemical combination of cellulose and acetic acid. Of almost the same transparency as glass, it does not crack or splinter and has the toughness and pliability of rubber. It is neither inflammable nor soluble, and it is impervious to the effects of gasoline.

Experiments with cellon have also been made extensively by the Germans, the Scientific American writer says, and for the same purpose, but without success, because of a tendency to warp, which they were unable to overcome. The French success lies in having eliminated that tendency. The invisibility of the machine means a great increase in scouting possibilities and less danger to operators. Since the aeroplanes can be detected only by the noise of its engines, it is no longer a target for hostile guns.

PROPOSITION. This offer was made in answer to a written proposition from San Mateo, agreeing to bring two teams if Riverside and Coronado would each send a quartette north. The easterners who are playing at Coronado, however, are unwilling to remain longer than for the tournament here, and would not enter into the agreement.

The East vs. West engagement is certain to be staged, however, with the eastern team built up around Stevenson and Beadleston of the Cooperstown club. If Walter Hobart, the five-foot man of the San Mateo team, is here, the westerners believe they can assemble a quartette which will hold the championship on this coast, for they have Hugh Drury and Harry Gordon Pattee of the local club, Burke and Reggie Weiss of the Midwick club and Maj. Ross of Coronado, from which to draw a team.

NO ARMY TEAM. The last hope of an army team was shattered in the receipt of a letter from Maj.-Gen. Bell, commanding the Department of California, in which he regretted to state that the artillery officers playing at Monterey had been called for target practice the latter

according to C. Fred Harlow, the chief impresario. The management plans to stage exhibition skating novelties in the evenings and in the afternoon to instruct the ladies of Los Angeles in the art of maintaining one's balance on two slender strands of steel on a surface smooth as glass.

THE BEST GARDEN HOSE. It is the registered trade-mark of a garden hose that costs no more than other brands that are entitled to a guarantee. It will last longer and give better satisfaction while in service than any other hose you can buy. It is cheaper than "CRACKPROOF" because it is the longest lived garden hose made.

"CRACKPROOF" was awarded the Grand Prize at the Panama-Pacific Exposition.

Sold by All Live Dealers. If your dealer cannot supply, write or telephone to Los Angeles office and we will see that you are supplied by mail or direct.

AMONG THE MUMMERS.

PAVLOWA TO BRING NOTABLE DANCE NOVELTIES.

By Grace Kingsley.

Anna Pavlova will offer many new features in the way of ballets and special dances to Los Angeles when she opens her engagement here with the Boston Grand Opera Company, and her own dancing troupe at the Mason, March 6. Pavlova is one of the most intellectual women of the stage, as well as its most accomplished artist of the dance, and since her last appearance here has worked out a number of brilliant new productions.

Among these is the Elysian Fields scene of Gluck's "Orpheus and Eurydice," a portion of the opera by the way is seldom presented. Following the underworld scene, the Elysian Fields appear with their enchanting meadows, garlanded with hedera and adorned with rivers and brooks gleaming gloriously. This scene has offered a great opportunity to Pavlova, who has worked out a ballet said to be one of the most beautiful ever seen, in which appear the artist herself, Alexandra Volinine and the entire Ballet Russe. The entire Boston Symphony Orchestra accompanies the dance.

Spanish dances that are genuinely Spanish have seldom been seen in this country. Mrs. Pavlova and her com-

Ethelyn Clarke.

Who will assist Joseph E. Howard in the presentation of his song revue this week at the Orpheum. The act is the headliner on the new bill opening today. Above is Violet Mercereau, the cute new star of the Universal Film Company.

act site of the school where she acquired these beginnings of wisdom.

Sincere Desert Stuff.
An entire company, composed of more than 100 people and equipped with the complete paraphernalia of the Incalvable historic "days of '49" equipment, consisting of ox-teams, prairie schooners and stage coaches, journeyed to the Mojave desert for the proper atmosphere when "The Aryan," the William S. Hart picture being shown at the Majestic this week, was taken.

Fisher's Children.
"Mutt and Jeff" will show up tonight at the Mason in an entirely new environment. They are at college and are football heroes. There is a big and beautiful chorus to three-choir them.

Will Start Revival.
Sir Herbert Beerbohm Tree is to revive "Henry VIII," upon a sumptuous scale at Kiaw and Erlanger's New Amsterdam Theater in New York, late in March, with a notable company of American and English actors. The Tree Shakespearean revivals have been a feature of the London season for some years past.

Constance Collier appears in the act of "listening." In other words, she has several offers to appear in pictures, but may accept that of Sir Herbert Tree to support him in his Shakespearean revival.

Novel Drinking Fountain.
William Farnum, star of the William Fox photodrama, "Fighting Blood," which is to be shown at Miller's this week, was lost in the Mojave desert during the making of the picture. He and several members of the company were obliged to drink from the water tank of the automobile in which they rode.

Takes Off the Meliers.
De Wolf Hopper, who is some "picketed" himself, attended the first performance of "Believe Me, Xanthippe," at the Morosco, yesterday, and said he considered it the cleverest travesty of melodrama he had ever seen.

SPRING TRAINING IS NOW UPON US.

BIG LEAGUE CLUBS COMMENCE THE GRIND.

As usual the South and the Southwest are the favored spots for lumbering up the Three Musketeers, with not a single Club Coming to the Pacific Coast.

(BY A. P. NIGHT WIRE.)
NEW YORK, Feb. 27.—With the major league meetings completed, peace declared and schedules adopted, the baseball magnates will now surrender the spotlight in favor of the player. Virtually all of the sixteen clubs in the American and National Leagues have completed their rosters for 1916 and are about to ship their squads to the South or Southwest for the spring training preliminary to the beginning of the pennant races.

As in past years Florida and Texas are the favorite States for the conditioning of the big league ball players, each securing five clubs. Louisiana and Arkansas are to entertain two clubs each, while Georgia, Virginia and Kentucky each get one. While several of the clubs have yet to fix a definite date for the beginning of training all sixteen will be at their southern camps before the middle of March.

The location of the various quarters and the approximate dates of the start of the main squads for the Southland follow:

NATIONAL LEAGUE.
Club and place. Date of leaving.
New York, Martin Springs, Tex., Feb. 28, March 1.
Brooklyn, Daytona, Fla., March 1.
Philadelphia, Palm Beach, Fla., March 1.
Boston, Miami, Fla., March 1.
St. Louis, Hot Springs, Ark., March 1.
Cleveland, Hot Springs, Ark., March 1.
Chicago, Hot Springs, Ark., March 1.
Pittsburgh, Hot Springs, Ark., March 1.

The spring training camps of the major league teams follow: New York Giants at Martin, Tex.; Yankees at Hot Springs, Ark.; Philadelphia Athletics at Jacksonville, Fla.; Boston Red Sox at Hot Springs, Ark.; Braves at Miami, Fla.; Philadelphia Athletics at Jacksonville, Fla.; Washington Nationals at St. Petersburg, Fla.; Washington Senators at St. Petersburg, Fla.; Chicago White Sox at Tampa, Fla.; St. Louis Browns at Palm Beach, Fla.; Cardinals at San Antonio, Tex.; Pirates at Hot Springs, Ark.; Cincinnati Reds at Shreveport, La.; Washington Nationals at St. Petersburg, Fla.; Cleveland Indians at New Orleans, La.

BOWLING NOTES.

Mrs. Guy Lapham and L. C. Young were again the feature in Alfred Macdonald's Mabelite Mixed Double Bowling tournament, having won the championship for the week's play and defeating their opponents by a score of 11-9.

Mrs. Lapham, 275, 280, 285, 290, 295, 300, 305, 310, 315, 320, 325, 330, 335, 340, 345, 350, 355, 360, 365, 370, 375, 380, 385, 390, 395, 400, 405, 410, 415, 420, 425, 430, 435, 440, 445, 450, 455, 460, 465, 470, 475, 480, 485, 490, 495, 500, 505, 510, 515, 520, 525, 530, 535, 540, 545, 550, 555, 560, 565, 570, 575, 580, 585, 590, 595, 600, 605, 610, 615, 620, 625, 630, 635, 640, 645, 650, 655, 660, 665, 670, 675, 680, 685, 690, 695, 700, 705, 710, 715, 720, 725, 730, 735, 740, 745, 750, 755, 760, 765, 770, 775, 780, 785, 790, 795, 800, 805, 810, 815, 820, 825, 830, 835, 840, 845, 850, 855, 860, 865, 870, 875, 880, 885, 890, 895, 900, 905, 910, 915, 920, 925, 930, 935, 940, 945, 950, 955, 960, 965, 970, 975, 980, 985, 990, 995, 1000.

Mrs. L. D. Mendenhall, 125, 130, 135, 140, 145, 150, 155, 160, 165, 170, 175, 180, 185, 190, 195, 200, 205, 210, 215, 220, 225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 285, 290, 295, 300, 305, 310, 315, 320, 325, 330, 335, 340, 345, 350, 355, 360, 365, 370, 375, 380, 385, 390, 395, 400, 405, 410, 415, 420, 425, 430, 435, 440, 445, 450, 455, 460, 465, 470, 475, 480, 485, 490, 495, 500, 505, 510, 515, 520, 525, 530, 535, 540, 545, 550, 555, 560, 565, 570, 575, 580, 585, 590, 595, 600, 605, 610, 615, 620, 625, 630, 635, 640, 645, 650, 655, 660, 665, 670, 675, 680, 685, 690, 695, 700, 705, 710, 715, 720, 725, 730, 735, 740, 745, 750, 755, 760, 765, 770, 775, 780, 785, 790, 795, 800, 805, 810, 815, 820, 825, 830, 835, 840, 845, 850, 855, 860, 865, 870, 875, 880, 885, 890, 895, 900, 905, 910, 915, 920, 925, 930, 935, 940, 945, 950, 955, 960, 965, 970, 975, 980, 985, 990, 995, 1000.

The league is the most promising one that has been organized in this city for many years and is fortunate in having as its members some of the best bowlers in the country.

The standing as furnished by Secretary Frank Green, follows:

TEAM STANDINGS.
Wm. Lapham, 275, 280, 285, 290, 295, 300, 305, 310, 315, 320, 325, 330, 335, 340, 345, 350, 355, 360, 365, 370, 375, 380, 385, 390, 395, 400, 405, 410, 415, 420, 425, 430, 435, 440, 445, 450, 455, 460, 465, 470, 475, 480, 485, 490, 495, 500, 505, 510, 515, 520, 525, 530, 535, 540, 545, 550, 555, 560, 565, 570, 575, 580, 585, 590, 595, 600, 605, 610, 615, 620, 625, 630, 635, 640, 645, 650, 655, 660, 665, 670, 675, 680, 685, 690, 695, 700, 705, 710, 715, 720, 725, 730, 735, 740, 745, 750, 755, 760, 765, 770, 775, 780, 785, 790, 795, 800, 805, 810, 815, 820, 825, 830, 835, 840, 845, 850, 855, 860, 865, 870, 875, 880, 885, 890, 895, 900, 905, 910, 915, 920, 925, 930, 935, 940, 945, 950, 955, 960, 965, 970, 975, 980, 985, 990, 995, 1000.

INDIVIDUAL AVERAGES.
Wm. Lapham, 275, 280, 285, 290, 295, 300, 305, 310, 315, 320, 325, 330, 335, 340, 345, 350, 355, 360, 365, 370, 375, 380, 385, 390, 395, 400, 405, 410, 415, 420, 425, 430, 435, 440, 445, 450, 455, 460, 465, 470, 475, 480, 485, 490, 495, 500, 505, 510, 515, 520, 525, 530, 535, 540, 545, 550, 555, 560, 565, 570, 575, 580, 585, 590, 595, 600, 605, 610, 615, 620, 625, 630, 635, 640, 645, 650, 655, 660, 665, 670, 675, 680, 685, 690, 695, 700, 705, 710, 715, 720, 725, 730, 735, 740, 745, 750, 755, 760, 765, 770, 775, 780, 785, 790, 795, 800, 805, 810, 815, 820, 825, 830, 835, 840, 845, 850, 855, 860, 865, 870, 875, 880, 885, 890, 895, 900, 905, 910, 915, 920, 925, 930, 935, 940, 945, 950, 955, 960, 965, 970, 975, 980, 985, 990, 995, 1000.

RAGGED EDGE FOLK.
 Isn't it funny how many people always seem to be just on the point of blowing up? They seem to jump from one tight place to another. If it isn't their finances it's their health, and if it isn't falling health it's domestic difficulties. What's the use of saving them, anyhow?

OTHERS NEED IT.
 An effort is being made in Los Angeles to facilitate the education of foreigners in United States speech and citizenship. We cannot see any reason for limiting this important service to the foreign born. There are a lot of people, whose ancestors have been American for more than a hundred years, who need a world of instruction along this line, as their views on national defense and preparedness will readily prove.

FOR SERVICE ONLY.
 Facts, just as facts, are sordid and uninteresting. Every person of any color or dream ought to go armed for the sole purpose of shooting any fact that intruded itself on his attention at any time when its acknowledgment was not urgent. When unnecessary facts die, they become statistics. When a statistician dies—well, we think a slight of Walter Ballard and we refuse to be interviewed.

WHERE THEY GET IT.
 Kite time is here. There is no reason why it should come to Los Angeles boys the last of February and the first of March. It happens that way in the East and Middle West, because that is the season of the winds, but out here, where there is always a breeze astir, the small boy might as well fly his kite at any other time of the year. We suppose that boys inherit an appetite for fashions from their mothers.

BENEDICTION.
 There are lives so blessed that they cannot understand anything except consecration. There is that spirit of praise which is gladness, and the spirit of beauty which apprehends all lovely forms. They know the song that is life's melody; they have the courage that is gentle because it is so sure. There is the hope that is realization and the love that is deathless. They have the wisdom consuming, and withal an abiding peace.

RUSSIAN ADVANCE.
 Russia advances in Asia Minor. She is making a surer, though less heralded, advance in the United States. Russian art, literature and music are capturing the American taste. Our book shelves are filled with Russian works; Russian drama, music and dancing are well to the front in all our cities. May Russia's advance in the future be more along these lines. There is no lack of brain power in the Slav Empire. It only needs directing aright. When Russia comes to America and America goes out to Russia we shall witness a new world in the making.

MODEST DEMANDS.
 The United Anthracite Mine Workers of America cannot be accused of overweening modesty in their demands upon the mine owners. They ask for an increase of 20 per cent. in all wage rates and a reduction of a labor day from nine hours to eight hours. If this demand is granted, the man who now receives \$3 for nine hours' work will receive \$3.60 for eight hours' work. His wages will be increased over 35 per cent., all of which must be paid by the people who burn coal for fuel.

They demand that only members of the union shall be employed as laborers in the mines; that there shall be no wages fixed by private agreement or except by the union, and that the employer shall not be allowed to select his own employees; that job he must leave to the walking delegates.

THE CALL TO THE COLORS.
 It may be urged that the Swiss system, which is framed so as to call to the colors, if needed, more than half of the adult males of that republic, would be unsuited to this nation of 100,000,000 people, where answers to such a call would result in an army of 10,000,000 soldiers. That objection is met by the suggestion that we might adopt all of the Swiss system except the compulsory feature. If the United States would open enlistment quarters in every State, and fix the maximum number of recruits that would be accepted, say at 1,000,000, it is more than probable that the quota would be filled in a few days, when the enlistment offices could be closed for one year.

Those volunteers whose physical and mental qualifications were satisfactory would be sent for three months to training camps, where they would secure quarters, rations and soldier's pay. After the first year eleven days in camp each year would refresh the training of the soldier and render him fit for service at any time. Three months of training would make of the average American a soldier "fit to stand by Caesar."

If there were not enlistments enough to make up the desired number of troops, the Swiss conscription system could be resorted to. But who that remembers how at the beginning of the Spanish-American War tramps and millionaires jostled each other in their eagerness to reach the recruiting stations, and how grimed hands and gloved hands were alike eager to clasp gun stocks, will doubt that a million men would speedily volunteer for service in the training camps.

CAPT. FREDERICKS'S ATTITUDE.

Capt. John D. Fredericks was the gallant standard bearer of the Republicans of California in the last gubernatorial election; his party loyalty and his fitness for leadership are unquestioned; and when he addresses the party he is entitled to a considerable hearing. But his letter to the Republican State Committee, printed in Sunday Times, has not the right ring and is not wise and far-seeing in its counsels, as this journal looks upon it. The captain is a little too eager for conciliation with deserters, a little too ready to compromise with them on their own terms; he places an imaginary value on a political proposition which would not pan out.

This is no time for faltering and nothing would be gained by it. For every Progressive vote gained by a hasty and miscalculated concession to the "come-outers" three stalwart Republican votes would be lost. There can be no doubt that the sentiment of the nation today is in favor of a return to Republican principles and policies of government; the people are weary of Democratic and "Progressive" experiments; they look to the Republican organization to lead them out of the wilderness; their hope is in the Old Guard. To surrender one jot of this prestige by trucking to the malcontents would be a political blunder and a betrayal of trust. Forward! And forward on the undeviating path of uncompromising Republicanism!

Capt. Fredericks favors the idea of the Republican and "Progressive" national conventions meeting in the same city on the same date. He fails to see the danger in the arrangement, the danger which The Times has repeatedly pointed out, viz.: that under such circumstances the Republican National Convention would be made to feel a pressure there would be weights attached to the giant's legs and strings fastened to his arms. The convention would be hampered and embarrassed and could not act with the freedom, boldness and confidence to be desired. There would certainly be attempts at bargains and deals, whereas the one thing needful is a steadfast adherence to principles. The Republican party of this nation should not be led into any nets of this sort—let the Progressives flounder about in their own nets, and let the Republicans have a free course on the straight road leading to victory, with no pitfalls in the way!

The Times is disappointed at the attitude of Capt. Fredericks. He is plausible, but weak, unsound and illogical in his suggestions, from the Old Guard standpoint. He advocates a scheme of getting together, if carried out, will not get anybody together on a right basis, but will only add in more getting apart and greater Republican losses. Capt. Fredericks shows too much readiness to make dangerous concessions to the "Progressives," who, once in the saddle, even if riding behind, will try to throw off the men in front. Nothing but disaster could come from giving them what they want.

Does The Times desire to see the "Progressive" voters back in the Republican ranks? Of course it does; and they are coming back in droves, in battalions. The Times is glad to see them coming back to the ranks, yes; but it does not want to see their leaders in the saddle. That is all! The Republican party must be led by Republican leaders. That is all! Any other policy would mean party destruction. If the "Progressive" managers were sincere in their protestations of a wish to defeat the common enemy they would not be trying at this juncture to force their leadership on the party they once betrayed. The Times earnestly urges that the Ark of the Republican Covenant be left in the Republican tent, with none but Republicans on guard—and that there be none of the perilous experimenting advocated by Capt. Fredericks.

LEGALIZED GRAFT.

An examination of the State records reveals that nineteen members of the present Legislature are on the different departmental pay rolls, and that eighteen others are indirectly rewarded for their support of administration measures during the regular and the special sessions of the present Legislature. A number of the independent members of the Legislature assert openly that it was solely through the direct use of patronage—through paid places given to legislators themselves—that the administration was able to pass a number of important bills. Half a dozen of these were defeated by the electors of the State at the special session last October, and not one was approved. This form of influencing votes by giving those who vote "right" certain salaried sinecures on the State pay roll represents the administration idea of reform, ultra-progressive in its tendencies. Independent members of the Legislature termed it "legalized graft." Falling in their attempt to have the Legislature submit to the electors of the State a constitutional amendment forbidding the appointment of a member of the Legislature to any salaried position during his term of office, thirty-five members of the present Legislature have prepared and placed in circulation an initiative petition submitting to the direct vote of the people the question whether such legalized graft shall be permitted to continue. This petition is now being circulated along with the referendum petition which seeks to prevent the members of one party from voting in the primaries of another.

In this connection it is interesting to note that the Progressive press is conducting against this initiative measure a campaign of discreet silence. Not one of the 124 Progressive papers in the State has opened its columns to a discussion of this petition, not one has discussed it editorially. They are seeking assiduously to keep their readers from knowing that it is in existence, or that the wholesale debauching of the Legislature through swapping jobs for votes has ever taken place.

Ten years ago there was a great cry about graft in the Board of Supervisors in San Francisco. It was charged that Supervisors sold votes on certain measures for cash. Gov. Johnson took a leading part in sending one of those accused of debauching the Supervisors to the penitentiary. His record as the attorney who secured the conviction of Abe Ruef was his chief recommendation to the voters when he was nominated for Governor in 1910. Yet this man, who professes in his speeches to abhor graft as he would the bubonic plague, has given salaried places to eight members of the San Francisco delegation to the Assembly who voted for his administration measures, and one of his commissioners fired the only

Breaking Into the Big League.

man on the State pay roll who voted against them. About the same time a prison board appointed by Gov. Johnson paroled Ruef.

These eight men who voted "right" are now drawing \$20,000 a year from the State treasury. Their actual monetary reward is greater than that alleged to have been received by the boodles Supervisors. Friends of real reform are asking what practical difference exists between giving men money outright and placing them on a pay roll where they will draw the money from the State.

In New York and a number of other eastern States the Constitution forbids placing members of the Legislature on the State pay roll for other jobs. Tammany played that game out years ago; it has remained for the only Progressive Governor in the United States to make such a restriction necessary to prevent fraud and corruption in our State government in California.

JUVENILE COURT AND PROBATION DEPARTMENT.

One of the marked features of the development of "child welfare" work in the past fifteen years has been the evolution of the Juvenile Court, with its attendant probation and detention home departments. From simply hearing cases involving minors the authority and province of this department of the court has been extended until in many States almost everything connected with the handling of children is being administered by or through the Juvenile Court.

Not only are complaints filed and cases heard where children or their rights are concerned, but the probation officers in many States have police power and can investigate and enter complaint, as well as take charge of the case and make investigations after a complaint has been filed. Also it is the rule now that dependent children become wards of this court. The court has the grave duty of declaring a child to be "delinquent" or "dependent" and then of deciding what disposition is to be made of this child. A "dependent" child in this State is not only one who has no natural guardians and who must be supported by the State; a child whose parents or guardians are determined unfit to care for it may also be made a ward of the court, while the parents support it. Many serious questions are involved in determining the status of cases. The "placing out" of children is a heavy responsibility. Every child who becomes a public charge is in constant danger and becomes a possible menace to society.

Also as the work has developed a large number of cases are brought to the attention of the court or the probation officers which are investigated, warned or reprimanded without any formal complaint being filed. The functions of the detention home have been extended until it has become much more than a mere stopping place from which the child is passed on to some more permanent disposition.

And now there is beginning to be serious question as to whether all these functions can best be administered by a court department. There is certainly great need of a responsible and centralized authority to deal with the handling of "maladjusted" children. The vital importance of reaching the child in the formative period is emphasized doubly by the statement now made authoritatively that at least 75 per cent. of all crime is committed by persons of defective or abnormal mentality. If this statement is true, the determination of the mental condition of the child or minor and the proper treatment of the mentally-lacking ought to greatly diminish the volume of crime and insanity which is so heavy a burden upon society. Experience has determined that a large per cent. of the children coming into the Juvenile Courts are defective in some degree.

We have agencies enough in California, too many in fact, trying to deal with children who are separated from their natural guardians and homes. There is too much red tape, too much conflict and too much waste of money—and of child life—through the lack of the investigation, classification and training of defective, delinquent or dependent children.

The court can only justify its existence by trying to make that existence shorter. His conclusion, after a careful survey of "twenty-five or more Juvenile Courts," is, "The present function of the Juvenile Court and its probation office could and should be performed by the school and the domestic relations court."

The correctness of this conclusion may be gravely doubted; but there can be no question that the present complicated and expensive machinery which has been built up about the Juvenile Court is not the final solution of the problem of caring for the unfortunate whose home conditions or character demand or justify State interference.

RIPPLING RHYMES.

STOLEN OR STRAYED.

What has become of the maidens fair, who pleased the eyes of the old-time swells, who made the drosses they used to wear, and looked as smooth as the modern belles? They made their gowns and they made their hose, they made their hats with a right good will; they made their quilts and such things as those, they sewed and darned with the darndest skill. They made good bread and they made good pies, they made good jam and they made good tarts; their doughnuts gladdened our weary eyes, and put new vim in our faded hearts. They took blue ribbons at county fairs for fragrant butter in golden rolls; a noble prize in skill was theirs—but now they're vanished. God rest their souls. They're past and gone to the brighter spheres, and no successors they left below; about one time in a hundred years you'll see a girl who can cook and sew. I like tea strong and I get it weak, the toast is burned and the steak is charred, and tears are glimmering on my cheek.

WALT MASON.

FROM A SINNER'S DIARY.

[Judge:] It's easy enough to boss when thou'lt mind.
 When you say a person is long-headed it does not mean he goes headlong.
 I know a man who is (not) just as nice to his family as to the neighbors.
 I know a sinner who has done something he ought to have left undone, and a saint who has undone something he should have left done up.

I know a woman who takes up her cross the minute she sees it if it breaks her back. Being neighborly—trading something you don't want for something you do.
 Love—glimpses of heaven and real, long staring spells into the other place.
 Housecleaning—doing evil that good may come.

You can tell whether they're mistakes by whose favor they're in.
 Be worse than it is if we knew "last times" and the time wouldn't it.
 It would ruin me to have a posy bed half as big as I spade up hunting for bait.

A telephone beats religion. People call up that never speak when we meet in the road.
 Don't it beat all? My little cousins, who day before yesterday I went to see as new babies, who yesterday I would have played to mention a boy's sitting beside them, today are promenading with beane Tomorrow they'll have bundles of flannel of their own to feed paregoric to. Don't it beat all, I say, that they can catch on and I can't?

There ought to be a law prohibiting the younger children marrying off till the older ones are provided for.

An Experiment.

[Washington Star:] "John," said the thoughtful woman, "get your overshoes. By the midnight breezes strown; Are wherever the best of her unseen feet, Which only the angels hear. May have broken the woof of my tent's thin roof. The stars peep behind her and peer; And I laugh to see them whirl and flee. Like a swarm of golden bees. When I widen the rent in my wind-blown tent. Till the calm rivers, lakes, and seas, Like strips of the sky fallen through me on high. Are each paved with the moon and these."

Had Been There.

[Cornell Widow:] "Come, cheer up, Jack, this isn't a funeral; it's time for you to get up and kiss the bride now."
 "That's where you're wrong, Bill. It's time for me to stop now."

[Liverpool Mercury:] Jerry: I have traced my ancestry back to an Irish king. Pat: Sure that's a lie. What chance has a dead man to defend himself?

CLOUDS OF JOY.

BY CHARLES COKE WOODS, D.D.

Clouds! So common a word, but what mist and mystery in it. Why should sunshine be the symbol and sign of cheer more than clouds? Does sunshine do any more for us than rain? Are the skies any less kind to us when they are clouded than when they are clear? Yet the cloud has gone into our human speech as a symbol of gloom. How common an experience to hear people call a cloudy day a gloomy day. We all fall into that unthinking talk now and then.

But clouds! Are they not beautiful? Think of clouds—storm clouds it may be broken into a million fragments, floating across the sea of a moonlit sky. In the thin places the moonlight sifts through. How white and soft and fleecy they look then. They take on degrees of brightness or blackness according to their density or their nearness to the moon. Or they go racing across the heavens like a flock of sheep chased by wolves. The wind is the wolf and we never see him. Yet how he sends these cloud sheep scurrying across these moonlit pastures of the sky. Did you ever take an outing on such an evening? What a memory—these fleecy sheep scampering over the sky meadows! Such a cloud pageant is a sight worth the seeing. But alas! I fear me there is a wonderful waste of beauty in it all because it falls on so many unseeing eyes. But how prodigal of beauty is God! If only two eyes will look He will spread out a whole skyful of beauty. The moonlit clouds are beautiful.

Many a starry beauty also looks through their stormy and broken blackness. On such a night the stars, looking through the broken places, are like big bright daisies blooming in a black field. And you say they do not look like that to you? More's the pity. Look again, and look until they do. The more you look anywhere for beauty the more will appear.

There is color on the clouds. Sunlight is a peerless painter. Sometimes his most beautiful paintings are on the blackest background. He is the painter of the rainbow. But he never paints it on a clear sky. It takes the stuff of storms mixed with sunlight to make rainbows. And that is so other where than on clouds. How wondrously all the rainbow bands of beauty blend into all the colors of creation. The canvas of cloud must be there or no rainbow can be there. The rainbow is a cloud creation in partnership with the sun. Let us thank the Creator for the cloud. Who has not seen the riot of color in the cloud at the sunset hour? Were a human artist to paint like that we would hurry to the other side of the world to see it. How silently the splendid colors fall across the closing doors of day. These colors, shifting silently, continuously, wondrously, as the evening twilight deepens, awaken feelings which are altogether wordless. We need not bother about our theories here, if we have any, but we shall just think thanks to God and be still. Is it any wonder that Turner, the landscape artist, bathed himself in the color glories of the sunset? And it is any wonder that such colors got into his canvases? It is no wonder that such beauty streamed from his brushes. The cloudy morning glories of sunrise—who has not seen them? These color tapestries of the dawn, when dew is on the grass, are bewitchingly beautiful. The dull and stony cloud turns crimson flame. Then it shimmers like a sheet of gleaming gold. Then it all breaks apart as if dissolved by this burning beauty of the morning. It hangs like tattered curtains of pink and gold across the eastern windows.

The clouds are freighted with riches for the world. The nutrient fields and pastures have fallen from the clouds. Clouds, no less than sun, went into the making of the meadows. The newly-planted garden beds waited through days of sunshine for the cloud and its showers. The gardener fed for shelter when the showers fell, but ten thousand buds and blades and blossoms came trooping out to catch the sweet baptism of the rain. The apple blossoms grew and put forth their fragrant bloom. The daisies bloomed and dripped with dew because the rain from brimming clouds fell in their faces. There are flowers in the rain and strawberries in the showers. Who has told us better than Robert Loveman what is in the clouds and what falls from them when it rains?

It is not raining rain to me. It's raining daffodils; In every single drop I see Be wild flowers on the hills; Though clouds of gray infest the day. And overwhelm the town— It is not raining rain to me, It's raining roses down.
 It is not raining rain to me. But fields of clover bloom. Where every cloverbuncher bee May find his board and room. Here's health for one that's happy. And a fig for one that frets— It is not raining rain to me, It's raining violets.

If anybody has sung a sweeter song about the cloud than Shelley I have not heard his singing. It is rather long, but two of the rarest stanzas must be given here to end this meditation on the cloud:

"I bring fresh showers for the thirsting flowers. From the seas and the streams; I bear light shade for the leaves when laid In the noonday dreams. From my wings are shaken the dews that waken The sweet birds every one, When rocked to rest on their mother's breast. As she dances about the sun. I wield the flail of the lashing hail, And whiten the green plains under; And then again I dissolve it in rain, And laugh as I pass in thunder."

"That orbed maiden with white fire laden, Whom mortals call the moon, Glides glimmering o'er my fleece-like floor By the midnight breezes strewn; Are wherever the best of her unseen feet, Which only the angels hear. May have broken the woof of my tent's thin roof. The stars peep behind her and peer; And I laugh to see them whirl and flee. Like a swarm of golden bees. When I widen the rent in my wind-blown tent. Till the calm rivers, lakes, and seas, Like strips of the sky fallen through me on high. Are each paved with the moon and these."

Couldn't Make a Speech.

[Sydney Bulletin:] The One: Good heavens, Wiggins, what have you been doing to your head?

The Other: Well, you see, dear boy, a man has to show some patriotic feeling these days, so I've been and had a military haircut.

PEN POINTS

BY THE STAFF.

Is this the spring that the war begins? The American eagle is not getting too proud to scream.

It is reported that the pretzel trade is not what it used to be in England.

So far no other member of the Wilson team has jumped to the outlaws.

But suppose the armed merchantman sees the little submarine first?

Another death by a student rush is reported, but the rush was not to the classroom.

The commander of the Appam wants to get away to take another ride on England's ocean.

Some of these ski runners would be hard to handle. They would be sure to jump their ball.

Wornout horses have reached New York butcher shops. The next thing we fear will be wornout automobiles.

A New York thief stole 100 moving picture scenarios. He should get a slice of the Carnegie hero fund.

It is a time for strong men to speak out for the preparedness of the nation. Let the pacifists do the talking.

If people would only talk about what they know what a lot of silence there would be in this old workaday world!

It has been decided in an eastern court that tipping is legal. And that is about the best that can be said about it.

Some of the pacifists are so strong in the game that back East they refuse to wear rubbers in the snow and slush.

If the rule of contraband is extended much further it will soon be impossible to import a shipload of early fall Dutch.

And now it seems that some of the administration's tax schemes, like that on term plank, are not made to be carried out.

It looks bad to see a German girl wearing a fur-topped boot, not knowing that fashion is a tribute to the Russian cause.

The Germans cannot do everything. They tried to smuggle rubber into the country the guise of onions and failed. They did not imitate the aroma.

Under the dye shortage the postage stamps are changing color, but their selling value is not diminished. They sell as far as the law allows.

Col. E. M. House has discovered the "German" in our friend. The colonel was soon in the old Doc Cook class as a perfectly good little discoverer.

The latest record of an earthquake indicated the disturbance about 3700 miles from Washington. We think we dated rumblings much nearer than that.

During leap year a girl may do pretty much what she did surreptitiously during the three preceding years, and what she did do during the three that follow.

The National Association of Tailors now worrying about the perfect man should say he is the fellow who buys few of clothes—and pays his tailor bills.

St. Louis is out with the customary announcement that hotel rates will be increased during the Democratic convention. Which is merely in the nature of a bunk.

Isn't it funny, or is it, that we keep on grumbling and finding fault with the world, never seeming to understand or appreciate that the fault lies with us and not with the world?

Those who say the munition-makers are behind the preparedness movement should be more specific and say how much they think former Presidents Taft and Roosevelt and other prominent advocates are getting for selling out the nation.

Pennsylvania is showing her wisdom in drafting former Senator Knox for service in the upper house. His experience and ability will be of service to the party and to the nation. There are entirely too few Knox and C. Knoxes in this country.

The inextricable confusion in public affairs at Washington recalls the statement of President Grant, that the mistakes of the Democrats were the greatest asset of the Republican party. Did you see such floundering in trying to do anything?

Unless all signs fall in the present war the Republican party will come back to its own and again control the destinies of the people. The nation is weary of the Democratic attempt to have the mismanagement of this country managed by an army of tax-eating pigmies.

TO A MUMMY.

[Revised and enlarged.] O Mummy, in your painted case, With shrunken, age-old awful face, All robed in stylish mummy trappings, Incased in scented mummy wrappings, Bedecked with gems of bygone ages, With charms prescribed by antique magic, Ptolemy, long since departed, Ere you were kind, or cruel-hearted? Did those drawn lips utter curses? Did you drain your subjects' purses? Were your commands the cause of plagues? Or did your words betoken shadows? You, who reigned in gorgeous splendor, Ere our world emerged from darkness, Could you speak, what mystic secrets To our ears would be imparted.

It may be, to this world returning From unknown space, your eyes are open. To penetrate the past, while gazing, And, with a tinge of awe, appraising, This fragile tenement of clay Which prisoned you one far-off day, And in this painted mummy case Reposes what was once your face.

New Leather Trimmings for Suits Here

At last we can announce this news which many have been awaiting. Spring styles call for leather trimmings on many garments—they are here in strips from one to four inches wide, in black, white, red, navy, russet, and in the Tokio effects—suede, glaze kid and skiver.

(Trimming; Broadway Annex)

The New Vogue For Sports Apparel Finds Coulter's Splendidly Prepared

It seems as if every other woman is making inquiry about sports apparel this spring. And to meet the unprecedented demand, there have appeared the most attractive styles imaginable, a few of which we speak of today:

Sports Skirts

—in golfing cloth, in white, Copenhagen, rose or tana, at \$6.50, \$7.50, \$9.50 and \$12.50.

—of velours, in gold, red, Copenhagen blue or rose, at \$10 to \$17.50.

Wash Skirts

—in cotton Bedford, at \$2.50, \$3.50 and \$4.50. In novelty Bedford, ratine, cotton gabardine or waffle cloth, from \$4.50 to \$6.50.

(Garment Section; Second Floor)

Sports Coats

—in all sorts of materials, from jersey cloth to the rich striped silks, priced from \$17.50 to \$47.50.

Dresses, Special, \$5.00

To close out a very few pretty models in all-wool, wool-and-satin, challis—the majority in small sizes; navy, greens and browns—we offer them today, special \$5.00.

Initialed Hand'ch'fs 12½c

Every initial, not a broken line; all linen, with the letter in plain design; we consider these remarkably good values at the price—each, 12½c; by the dozen, \$1.50.

(Handkerchiefs; Main Floor)

Elegance in Plain Woolens and Satin-Faced Silks | Many People Are Buying Bedding Supplies

Novelty weaves in wools and silks may come and go, but the staple plain goods are in fashion year in and year out—and always in good taste. You will desire to see these—and certainly will be interested to note their very reasonable prices:

Epingle Satings

—42 inches wide; in a good assortment of new colorings, \$1.00

—50-inch epingles, in all shades and black \$1.50

French Serges

—46 inches wide; in shades for street garments \$1.00

Wool Poplins

—46 inches wide; in the colors most fashion favored for spring \$1.25

New Serges

—in the shades for dresses and suits; 50-inch width, \$1.25 & \$2

Wool Bengalines

—56 inches wide; dark colors only, at \$2.00

(Silks; Woolens; Broadway Annex)

Satin-Faced Silks

—in a full range of dark colors, black and the evening shades; and in all new weaves—

35-inch Satin Messaline, \$1 and \$1.25.

33-inch Satin Majestique, \$2.00.

36-inch Satin Majestique, \$2.25.

35-inch Satin de Luxe, \$1.50.

In Wider Widths

40-inch Satin Charmeuse, \$2.50.

45-inch Satin Paeon, \$3.50.

42-inch Satin Tailleur, \$4.00.

40-inch Satin Cashmere, \$2.50.

Satins for Formal Gowns

are much in vogue; we show a most attractive array of the weaves and shades most in demand.

(Silks; Woolens; Broadway Annex)

Because they realize the truth of our oft-repeated assertion that prices on these things are constantly advancing; bedding, having no style, may safely be bought for needs far in the future:

Feather Pillows

—the very best quality mixed feathers; full size; best ticking; regularly \$1.25 each, for \$1.95c

Bungalow Plaid Blankets

—Coulter's Special; full size; beautiful colorings; soft and lofty; reg. \$4 pair, now \$2.90

Better Than Most Sales Are These Values in High-Grade Linens

Indeed, even at special sales you cannot take advantage of such low prices on high-class linens as we offer today's patrons. While we have any linens in stock that were purchased before the many advances in price, we intend to share with our customers the savings:

Napkins, \$3.50 Doz.

—75 dozen 22x22-inch pure linen, snow white and very fine napkins; real pure linen, grass bleached; in five different designs.

Our Dollar Damask

—comes in ten different designs; a pure, heavy Irish linen that is incomparably good at the price.

Napkins, \$4.85 Dozen

—a limited quantity of extra fine and extra large (25x25) napkins; slightly soiled, in assorted designs; regularly \$7.50 a dozen.

For Monday Only, Japanese Spreads, \$3.75

—90x100 spreads, extra large, with Japanese printed designs in peach blossom, swallow and other patterns, done in blue; our best \$5 Japanese spread, special today only, \$3.75.

(Linens; Rear South Aisle)

Table Linen, \$1.25 Yard

—pure Irish linen in fifteen new patterns of more than ordinary beauty of weave and design; this is an extra value, indeed, at the price.

Napkins to Match, \$3.50 Doz.

—in 22x22-inch size.

Round Table Cloths, \$4.50

—round scalloped designs; 72 inches round; you have never seen their duplicates in quality under \$6.

Bedsread Sets, \$2.90

—scalloped, full size spreads, with bolster sham to match; only 25 in the lot; on sale today at \$2.90.

TO CHARGE CUSTOMERS: All purchases made on and after February 25th appear on statement rendered you April 1st.

Children's Spring Coats

That little people's garments have their own styles, as well as do those of grown-ups, is amply demonstrated by the wonderfully pretty new coats that a recent express has brought us:

Full Length Coats

—and sports styles, too; in plain materials, mixtures or checks; with fancy capes and collars; the plain colors trimmed in plain silks; priced from \$6.00 to \$14.00.

Disposal of Winter Coats at Half

—All must go, hence the price-cut; broken lines from 1 to 14-year sizes; good, practical styles.

(Children's Wear; Second Floor)

Children's School Hose

Every mother welcomes the advent of a stocking for her girls and boys that as nearly as possible obviates darning. We have them and sell quantities to women who have learned how wear-worthy they really are—

School Hose—in light, medium or heavy weights; some of them made with triple knee; the very best quality that money can buy, 25c a pair; and the famous

Holeproof Hose—for girls and boys; three pairs, guaranteed against holes for three months, for only \$1.00 the box. For girls, in black and white; for boys, black only.

(Hosiery; Main Floor)

Drug Sundries

Water Bottles or Syringes

—Challenge brand; red rubber, guaranteed; 2-quart \$1.00, 3-quart \$1.25

Rubber Gloves, 35c

—the regular 50c quality; all sizes.

Sanitary Napkins

—seamless; Hygienic brand; 35c dozen; three dozen for \$1.00.

—Faulstich brand crepe toilet tissue; warranted pure and sanitary; not over ten rolls or packages to a customer; each 5c

Moth Destroyer

—Samurai—superior article for the preservation of garments, furs, blankets, etc., large can \$1.00

Coulter's Flannel Soap

—5c bars (limit seven to a customer) special, seven cakes for 35c

Hair Brushes

—air cushion brushes, regularly \$1.25 each 75c

(Toilet Goods; South Aisle)

The Fashion Prevails Again For Colonial Patchwork Quilts, Coverlets, Etc.

You will fancy yourself back in the days of the Pilgrim Fathers if you step into the up-to-date woman's guest-rooms or nursery nowadays—particularly if she happens to be one of those who does much fancy work. For there is a renewed craze for the old-fashioned patchwork quilts, coverlets, etc., that our ancestors so painstakingly made by hand; and since women will have them, we offer

Complete Packages

—of bedroom sets (bolster, table, dressing table cover and pillows,) all to match.

—Babies' Quilt, crib pad and pillow sets.

—All packages are complete; carefully cut out in suitable colors, with material ready to apply; and full instructions for every detail of the work.

Made-up Samples

—on display—spreads, baby spreads and quilt, with pillow to match.

(Art Needlework; Third Floor)

We've Plenty of the New Drape Veils

Although it keeps buyers busy securing them as fast as we sell them, so keen in the demand just now.

Newest Meshes in drape and circular styles; plain or thread-run designs in black and colors, from 75c to \$5.

Gimpes at Half

—the high-neck gimpes; vestees and similar neckwear that many women prefer; we are holding a special sale of some of the choicest pieces (values \$1 to \$10,) at exactly half

(Hosiery; Vellings; Main Floor)

Pretty Ribbons at 35c Yard

Warp prints, stripes, plaids, checks, Jacquards and some plain colors in satin and taffeta weaves.

Ribbons, 4½ to 7 inches wide at 35c, aren't going to go begging for buyers, that is certain; indeed, they comprise values up to 80c a yard, but in incomplete color array; special 35c

(Ribbons; Main Floor)

These Are Staple Qualities of Sheets and Pillow Cases at Marked Reductions

We take these goods direct from regular stocks—they are not made for sale purposes, but are carefully made and finished, out of heavy muslin that will wash and wear well, and give satisfactory service. At these prices we can fill no mail or telephone orders, and they hold good today only:

Pillow Cases, 18c

—torn size, 45x36; 3-inch hem; splendid quality; regularly 22½c

Bed Sheets, 69c

—torn size 72x99—0r, 2 yards wide and 2¾ long; regularly 80c each.

—of similar quality muslin; 2¼ wide by 3 yards long; regularly 95c, each 85c

(Domestic; Rear South Aisle)

New Arrivals in Spring Wash Goods

We might write at length about the novelty wash materials that are coming in each day—and each day's arrivals seem lovelier than the ones that came before—but today's news must concern the sturdy weaves that make up into pretty little dresses for children, into house gowns, bungalow aprons and the like:

Dress Gingham—27 to 32 inches wide; in all the new styles; plain colors, plaids and stripes, yard, 12½c to 25c

Galatas—in every color; the standard sturdy wash goods 20c

Devonshire Cloth—favorably known by all women who sew 25c

Punjab Percal—a splendid weave at 15c

Madras—32 inches wide 25c

(Wash Goods; Rear South Aisle)

VENICE. LOSES HIS LIFE TO SAVE SISTER.

Life-lines Break Twice as They Fight to Gain Shore.

Vancouver Physician Drowned; Woman is Rescued.

Guard Plunges to Aid, but is Unable to Get Both.

[LOCAL CORRESPONDENCE.]

VENICE, Feb. 27.—Hundreds of showers ceased their gambols yesterday for a short while to watch Dr. Hakon Christensen, a physician of Vancouver, B.C., put forward all the strength he had to save his sister, Mrs. R. Toft, also from Vancouver, from a treacherous undertow. The man lost his life; his sister may live.

Dr. Christensen and his sister came here about four days ago. This afternoon at 2 o'clock they left their apartments in the Waldorf Hotel on the coast front for their daily dip in the surf. Both being good swimmers, they ventured out further than the other bathers. Being suddenly caught by an undertow, Mrs. Toft called for help. The physician, who is about 40 years old, hurried to her side. He managed to keep her above water but was rapidly weakening when persons on the beach saw him a buoy from a life station. He grasped it, but when people on the beach began to pull the rope snapped. An ineffectual attempt was made to raise a bell used for alarm purposes. It remained silent. Life Guard Townsend, however, grasped another buoy and hurried to the side of the man and woman. The crowd on the beach eagerly grasped the rope and began to pull, but this rope also broke. Dr. Christensen was overcome and the one life guard battled to bring him ashore. He managed to save Mrs. Toft but all efforts to resuscitate the physician failed. The man was drowned within 100 feet of the shore. The crowd on the beach was taken to the morgue of Hewitt & Co. and his sister taken to St. Catherine's hospital. Tonight Mrs. Toft regained consciousness, six hours after the accident. Physicians of these institutions will not let her go. When told of her brother's death she became hysterical. Little is known here of Dr. Christensen and his sister, as they came here from Vancouver for a vacation.

San Diego.

HUNT CONSPIRATORS.

Several Officers Determined to Find Out Who Painted Inscriptions on Bow of Destroyer Whipple. Crew Complains of Petty Affairs Aboard.

[BY A. P. NIGHT WRITER.]

SAN DIEGO, Feb. 27.—A sweeping investigation was started today by officers of the destroyer Whipple in an effort to discover the member or members of the crew who painted the inscription "C. P. O. Madhouse" in huge red letters on the bow of the ship shortly after midnight Saturday.

Lieut. J. A. Alexander, temporarily in command of the Whipple in the absence of Lieut. Francis D. Friton, said today that the affair was a schoolboy prank, but he declared he was determined to lift the matter to the bottom. Members of the crew, however, said that if feeling has been brewed for more than a year, not so much against the commissioned officers of the vessel as against two chief petty officers, who, they allege, have been shown undue favoritism. The crew was unanimous in denying that the quality of food served had been in the recent revolt, which came to a climax with the painting of the inscription, said to represent "petty officers' madhouse" on the bow of the destroyer.

Long Beach.

SOON TO SET SAIL TO SEEK TREASURE.

[LOCAL CORRESPONDENCE.]

LONG BEACH, Feb. 27.—Declaring that he has positive knowledge of a cache of treasure in the North Atlantic near the Canadian coast, Milton McMillan, wealthy "finder of fortune" who lives at No. 1025 East Ocean avenue, is preparing an expedition by sea to hunt for the gold. Associated with him are Capt. Ward, an aged navigator, and two wealthy citizens of Los Angeles.

Mr. McMillan, who, eight years ago brought to the notice of the scientific world the ruins of San Nicholas Island, talks freely of the proposed treasure hunt until he is interrogated regarding the exact location of the island. Then he is silent. He says the gold and jewels—hidden by a pirate chief, of course, a la Stevenson—is secreted on a mushroom shaped island somewhere off the coast of Labrador. His faith in the idea that he will bring to light the twentieth century horde of a pirate of the eighteenth is shown by his extensive buying of supplies for the trip, which will be made via the Panama Canal.

He says this island is just one ledge of birdseye porphyry looming out of the deep, altitude 300 feet, 250 feet long and 150 feet wide. The location is safe for navigation near to the island only two months out of the year, he says, because of the storms which visit those latitudes. The sea captain, Ward, whose grandfather roamed the deep in the early part of the nineteenth century, brought the story of pirate wealth hidden in the reef.

Capt. Ward says he got the word from his grandfather, who in turn received it from his grandfather, that one of the blood-thirsty robbers of the sea, who scuttled many a good ship during the Colonial days hid his booty of years on this island and then had to flee away and die somewhere. Anyway, Mr. McMillan has confidence in the yarn of Capt. Ward and his seafaring ancestors, and he is willing to stake thousands on the expedition. The vessel, which he says he will charter immediately, will leave Long Beach in six weeks.

SURPRISE TO HER.

Glendale Woman Finds Signboard on Lawn with an Inscription.

[LOCAL CORRESPONDENCE.]

GLENDALF, Feb. 27.—"Vote wet; do it until death!" is the sign done in bright green paint on a blackboard in a conspicuous place on the property of Mrs. Mary Gaylord on East First street, that startled her friends yesterday.

Mrs. Gaylord is one of the best-known workers of the W.C.T.U. in Southern California and her attitude toward liquor is not approved by some of the younger element of the community as evidenced by the sign discovered on her blackboard which has been ruined by the paint. Every one in the community disclaims knowledge of the affair. It indicates, however, that the younger element of the city are taking an active though unwarranted interest in the line-up of local politicians for the municipal election to take place early in May. Mrs. Gaylord has announced her candidacy for City Clerk.

Pasadena.

IMMIGRATION BALL AT HOTEL GREEN.

NOVEL FUNCTION IS PLANNED FOR TUESDAY EVENING.

Miniature Ellis Island, with Landing Docks and Customs Offices, to be Reproduced—Humor of Secret Visit of the Shepherds to Los Angeles—Other News.

[LOCAL CORRESPONDENCE.]

PASADENA, Feb. 28.—The great tide of immigration, which has turned toward Pasadena, will be centered at the Hotel Green Tuesday evening when the immigration ball, which will mark the most pretentious of all the costume dances held at this great hotel this winter, will be given.

On this occasion the hotel will be transformed into a miniature Ellis Island, with landing docks and all the paraphernalia of a real seaport. As the guests arrive at the hotel they will be taken to the second floor, which will correspond to Ellis Island, where they will be examined to see if they possess the necessary qualifications which will entitle them to entrance.

After passing inspection successfully, they will be escorted down the gang plank of the ship to the dock, which, by the way, happens to be the Romanesque room. Here will be conducted a series of humorous sketches which have made the seaport towns so picturesque, among which will be seen the Italian, with his organ and the inevitable "monkey" and the German band and others.

There will be no seats, but the immigrants may rest at their ease on trunks and packing-cases, which will be stacked all around the room. The same will apply to the ballroom, which will be entirely cleared of all accumulations so that at least 1000 couples may dance in comfort.

A constant stream of visitors gave color and life to the new Casa Loma apartments at No. 244 Worcester avenue on Saturday, when the beautiful structure was formally opened. From top to bottom the sunny home-like place was literally buried with magnificent flowers, the gifts of friends of S. C. Pratt, who built the apartments.

THE SHEPHERDS HERE?

An unconfirmed rumor was going the rounds yesterday to the effect that Mrs. J. Finley Shepherd, formerly Miss Helen Gould, Mr. Shepherd and their little adopted boy had been in Pasadena and Los Angeles Friday and Saturday, stopping in their private car some place.

According to the rumor, they left yesterday for some other California city, very much perturbed for fear that it would be learned that they are on the Pacific Coast.

CITY BRIEFS.

Cyrus H. K. Curtis of the Curtis Publishing Company, is one of a number of guests who arrived at the Hotel Huntington yesterday. Dr. Charles R. Mayo, one of the Mayo brothers of Rochester, Minn., is expected at the Maryland today, as is Roderick H. White, noted artist and brother of Stewart Edward White.

Hotel Vista del Arroyo, Pasadena.

Long Beach. "COFFIN-NAILS" CUT AVERAGES.

Public School Pupils Who Smoke are Poor Students.

Ice Companies Compromise for Season's Campaign.

Long Beach to Request Lower Insurance Rates.

[LOCAL CORRESPONDENCE.]

LONG BEACH, Feb. 27.—Learning that one-seventh of the male pupils of the High School smoke cigarettes, and that the scholarship of this "smoking band" is comparatively low, Principal Burcham of the High School has started a campaign to eliminate smoking altogether.

The school authorities call attention to the fact that Long Beach High is no exception; that boys attending high schools all over the State smoke, but they want My Lady Nicotine banished entirely from the campus. Mr. Burcham, having received carefully-complied reports from the teachers and student body officials, says there are 100 of the 700 boys who use tobacco. Out of this number the scholarships of only a few stand the test of merit. The average standings of the hundred smokers for the past year was 74, while the required grade for passing is 75. Among the graduates from the school last year there were fourteen users of cigarettes and only one of these was certified to college. Those who did not use the weed had marks 10 per cent. better than those who did.

ICE WAR ENDS.

After warring a costly price-cutting war for two years, the two ice companies now making and selling the congealed water product in this city have reached an agreement and will raise prices. The companies will have uniform prices and the consumer will have to puntle up or start another plant, an action which is improbable.

When the Home Ice Company entered the local field two years ago, ice prices were at a low level, but housewives were importuned to take the product at a cost less than that of producing ice. Neither of the companies made anything, but the war continued through last summer to the detriment of the men who put their money into the business. After several meetings the officials of the two concerns got together and agreed that they would quit the throat-cutting tactics and fix prices which would give returns on investments.

LOWER INSURANCE.

With the cost of living advancing rapidly, the people of Long Beach seek to lower insurance rates. Mayor W. W. Linseny states that an investigating committee of city officials headed by Fire Chief Shrewsbury, will be named early next week to make overtures to the underwriters to the end that the rates be reduced on both business and residence property.

The people here feel that they have the best fire department of any city in Southern California outside Los Angeles and San Diego. They point to the efficient record of the local department and to the fact that there has not been a disastrous or even costly fire here in years. The taxpayers have acquiesced in elaborate expenditures by the City Commission on the fire prevention department and feel that they should be reimbursed with a reduction in rates of insurance.

INDEMNITY BOND.

The payment of the sewer contractors for the big system just installed having been held up because of a dispute regarding the efficacy or necessity of "air cradles" under the pipes at certain points in the main sewer, Commissioner Williams suggests that Contractor Bent put up an indemnity bond of \$50,000 to protect the city against possible loss. This suggestion has met with the indorsement of the Ad Club and will probably be sanctioned by the Chamber of Commerce. The City Commission will take up the matter of final payment of the contractors at their next regular meeting.

CREEK AS HIGHWAY.

Pomona Proposes to Build a Road Along Bed of Flood Stream.

[LOCAL CORRESPONDENCE.]

POMONA, Feb. 27.—It appears to be a foregone conclusion that this city and the county will convert the bed of Thompson Creek into a boulevard. Supervisor J. J. Hamilton and County Engineer Joyner were here yesterday to go over the ground with members of the City Council, and the understanding seems to be that the best way to control Thompson Creek is to pave it from the Baseline road to Ganesha Park in this city.

In case such an arrangement is decided upon, the county will construct a cement pavement twenty-two feet wide with twenty-four-inch curbs from the Baseline road to the Foot-hill boulevard, while the city will carry the improvement from Foot-hill boulevard to Ganesha Park. The improvement would reach practically three miles. A one-inch convex crown slope will probably be used to throw debris into the gutters. It is estimated that such an improvement will cost the county about \$15,000 and the city of Pomona about \$10,000. If such a plan is carried out, Thompson Creek, which has long menaced this community, will be converted into a highway short-cut from Baseline road to Foot-hill boulevard and it can be used as a boulevard eleven months out of the year. The remaining month it can be used as a channel to carry off the flood waters from the foothills.

CANDIDATES NAMED.

[LOCAL CORRESPONDENCE.]

HUNTINGTON PARK, Feb. 27.—The Citizens' ticket, to oppose the "Nonfactionists," includes City Trustees Eugene de Prex, N. O. Fleming, Mrs. Emma Chismar, Clifford L. Cyphers and William H. Sorbner. Independent candidates include: L. Evers, W. B. Hooper and W. T. Salvin, for Trustees; W. H. Boss (Incumbent) and William R. Reese, for City Clerk; and Mrs. Mary A. McCormack (Incumbent), for City Treasurer.

Santa Ana. BONDS FOR REPAIRS.

Orange County Board of Supervisors Arranged to Vote Issues to Re-build Bridges and Put-

ting Highways in First-class Condition.

[LOCAL CORRESPONDENCE.]

SANTA ANA, Feb. 27.—The Board of Supervisors has issued a call for \$150,000 bonds for building bridges and repairing damage done to highways and bridges in recent storms. The election is to be held on May 3.

Of the \$150,000 there will be \$110,000 for bridges, including a 600-foot concrete bridge on the State Highway west of Orange; \$10,000 for a wooden bridge at Yorba; \$25,000 for lengthening the Olive bridge and \$5000 for a new bridge at West Seventeenth street.

There will be \$15,000 used to re-open the Santa Ana Canyon road, which is the main avenue for vehicles between Riverside county and Orange county, and \$10,000 to re-open the

Alhambra.

TIPS TO THE WISE ARE MORE THAN SUFFICIENT.

[LOCAL CORRESPONDENCE.]

ALHAMBRA, Feb. 27.—James Paxton, his valet and eight suit cases were here yesterday. Mr. Paxton, the valet and all the suit cases are gone and every real estate agent in the city has been stirred to life by the visit.

Mr. Paxton, small and nervous, arrived here about noon in a large limousine. He ordered an elaborate luncheon for himself, valet and chauffeur. When the courses arrived Mr. Paxton calmly had his portion removed to an adjoining table and ordered a "malted milk" from a nearby drugstore.

After luncheon Mr. Paxton called up every reliable real estate man in the city and when they congregated at the Centre Hotel he told them what he wanted. Mr. Paxton wanted an estate, not a little piker \$50,000 estate like some people own out here, but a big one, with a big view, and six figures.

Mr. Paxton tried to tip the hotel waitresses with \$10 gold pieces but was restrained by his valet, so the real estate men fought with each other to see who would show Mr. Paxton his sales first.

Mr. Paxton insisted on riding in his own car and the real estate agents took turns about in showing off their properties. At 10 o'clock last night Mr. Paxton was through with Alhambra and said so. "Haven't seen anything I want," remarked the little man, and he ordered the driver of the big machine back to the city.

The valet of Mr. Paxton, who gave a Times reporter a short interview while the swift survey of Alhambra real estate was being made, said: "Mr. Paxton is a Pittsburgh millionaire. He would give away his fortune in tips if I did not watch him. He wants to settle in Southern California and will pay a large price for a residence here. His hobby is animals and he will stock his estate with the costliest and best-blooded in the world. We will probably go from here to the San Joaquin Valley. Mr. Paxton is going to buy in Southern California and when he does, the price will not be considered."

Santiago Creek road above the county park.

Following a conference with Engineer S. H. Finley of the County Highway Commission and County Surveyor J. L. McBride it was decided to ask for \$150,000 instead of \$200,000, which amount had been considered. The engineers reported the damage to roads to be less than was at first reported.

GETS LONG TERM.

Charles Schwall, a fisherman of Newport Beach, was today sentenced to ten years in San Quentin after he had pleaded guilty to a charge involving relations with his niece, Amanda Schwall, aged 14.

That Schwall was a man of good standing and on several occasions had distinguished himself for bravery was shown by attorneys for Schwall. Attorney Clyde Bishop said that he saw Schwall, though almost exhausted, swim out at night to rescue a man who had been tipped out of a boat in which Bishop and several others had been riding.

CARBIDE BURNS CHILD.

The 3-year-old daughter of F. E. Harrison of Garden Grove, is in danger of losing the sight of one eye as the result of a burn from carbide. Carbide had been dumped out of a lighting plant in the yard, and in play the tot got some of it into her eyes. Only one eye was dangerously injured.

BUY ALFALFA LAND.

Father and Son Pay Large Sum for Property Near Porterville.

[LOCAL CORRESPONDENCE.]

PORTERVILLE, Feb. 27.—F. X. Eberle and his son, Hermann D. Eberle, have closed a deal for the purchase from W. D. Browning of 240 acres of alfalfa land southwest of here, paying \$40,000 for the tract. The place is highly improved and there is on the ranch the largest deep well in the valley, one which is producing 250 inches of water. The new owners are here at the present time planning extensive improvements and have announced they expect to import a herd of high-grade cattle with which to stock the property.

Merle D. Smith of Riverside has purchased from C. L. White 140 acres of foothill land in the Succum Valley east of here, paying \$25,000 for the property. There is included in the purchase twenty acres of young hawels, twenty acres of alfalfa and 100 acres of citrus land unimproved. Smith will make his home here with his family.

The girl with a clear skin wins

If you, too, are embarrassed by a pimply, blotchy, unattractive complexion, just try Resinol Soap regularly for a week and see if it does not make a blessed difference in your skin. In severe cases a little Resinol Ointment, should also be used. Resinol Soap helps to make red, rough hands and arms soft and white, and to keep the hair healthy and free from dandruff. Contains no free alkali.

Resinol Soap and Ointment had eczema and similar skin-eruptions and usually cure itching instantly. Samples free, Dept. 7-31, Resinol, Baltimore, Md.

M. A. NEWMARK & CO., Wholesale Distributors.

Broker Sought.

(Continued from First Page.)

of this city could fill an order for more than 20,000,000 cartridges. "After I furnished my brother with this information, he and Mr. Hall arranged a deal for the purchase of 1,000,000 cartridges. I am confident the contract was closed in a satisfactory manner and the ammunition will be delivered to Capt. Tauscher. Mr. Hall is on his way to New York and will probably arrive there tomorrow morning. I do not believe my brother is accused by any of his partners of stealing the money paid to him by Capt. Tauscher on this contract." Mr. Dodge displayed the following telegram, which he said was received yesterday from J. Connolly, secretary of the George G. Dodge Company of New York:

"Lawrence E. Dodge,
"Hayward Hotel, Los Angeles:
"Wire description of Hall so I can meet him. Mail contract for cartridges."
[Signed] "JACK."

Mr. Dodge declared his brother and Mr. Hall will probably meet in New York in a few days and arrange for the final delivery of the cartridges.

according to the terms of their contract with Capt. Tauscher.

TAUSCHER'S RECORD.

Capt. Tauscher attracted national attention last summer when munitions of war valued at \$75,000 were discovered in a burning warehouse in New York and traced to him. It was also considered a significant fact that all of the cases of rifles, cartridges and other munitions discovered by Federal agents on the vessel Annie Larsen bore the name of Hans Tauscher. When the \$75,000 consignment of rifles and other articles were found in New York in a warehouse, W. Stokes Kirk, a broker with offices in Los Angeles, is alleged to have informed the Federal agents that the guns were discarded American arms, sold by him through a middleman to Capt. Tauscher. Mr. Kirk stated to the Federal agents that he did not know Capt. Tauscher, who is said to be an agent of the Krupp, was the purchaser until the settlement was made. This purchase on the part of Capt. Tauscher, as well as the ammunition, rifles, etc., found on the Annie Larsen, was the subject of a Federal inquiry. A searching investigation is being made, it is said, into every purchase of munitions made by Capt. Tauscher or his agents during the last eighteen months, and each purchase is being traced to ascertain where the guns and war material finally went.

Large purchases of cartridges, guns and other weapons, either new or those discarded by the American army, have been the subject of recent investigation, it is said. The fact that millions of cartridges and tens of thousands of guns and bayonets have been stored near the borders gave the Federal authorities a shiver from which they have not yet recovered. These guns, in the hands of aliens in the event of an uprising either on the Canadian or Mexican border, would prove a serious menace to the peace of the nation. Mr. Kirk in discussing the sale of large quantities of war material stated that he felt no fear of violating neutrality laws because of the sea conditions. The investigators pointed out, however, that in the event of trouble between this country and Mexico, which the sale of war material might indicate, the presence of large quantities of rifles and cartridges in hidden places would be a serious affair for America and for this reason, a close watch is being kept on the activities of agents who are engaged in purchasing war munitions.

FOUR ROBBED.

Woman Among Hold-up Victims: One Man is Beaten.

In the dark hours yesterday morning four pedestrians were held up and robbed on the streets.

Mrs. Gustave Nelson was nearing her home, No. 2477 Enterprise street, when two men stepped from behind some foliage, pressed a gun against her breast and ordered her to put up her hands. She did so and they snatched her purse, taking \$10 from it and throwing it at her when she fled.

J. F. Imber, No. 316 East Eighth street, was walking home at Alameda and Second and Third streets, forced into a shadowed doorway and struck on the head with the butt of a revolver. He then took \$10, and his money, less than \$10, and his watch.

P. Rossie, No. 937 Date street, was walking home at Alameda and Main streets, when two men stopped him and took \$25 from him.

A. M. Ross, No. 308 East Second street, was held up at Winston and Los Angeles streets, and robbed of \$5 and a gold watch.

New Church of St. Ignatius Loyola.

Dedicated yesterday.

More than 800 persons were present at consecration of handsome Catholic structure. Monsignor Harnett was celebrant of mass.

Ceremony. NEW ST. IGNATIUS CHURCH DEDICATED.

MORE THAN EIGHT HUNDRED AT
SIGNIFICANT SERVICE.

Great enthusiasm as to the future growth of the parish is evidenced, as buildings are crowded to capacity—Mr. Harnett Urges Faithful Work.

More than 800 persons attended the dedication ceremony of the Church of St. Ignatius Loyola, held yesterday afternoon in the buildings at Monte Vista avenue and Avenue Sixty-one. Monsignor Patrick Harnett was celebrant of the mass, and was also the administrator.

About thirty of the older boys, led by two priests, marched around the grounds and into the church. The many persons present followed, crowding the new building to its capacity. Rev. William Ford, pastor of St. Brendan's, was deacon, and Rev. M. O'Gorman of the Church of Our Lady of Loreto, subdeacon. The Rev. Joseph McManus, pastor of the church, preached the sermon.

Great enthusiasm as to the ultimate growth of the church was evident at the service. Monsignor Harnett declared the people of the parish should strive to further the development of their church and increase its membership.

The new church is a cement-plaster frame building, 53x112 feet, with a tower, a large vestry and sacristy, a baptistry, choir loft and music-room. The seating provides for 400 com-

fortably. The rectory is a two-story frame structure, 41x29½ feet, containing twelve rooms and accessories. The cost of the church and rectory is said to be \$60,000.

The style of the building is modern in treatment, somewhat reminiscent of the Lombardic architecture of Northern Italy, and is considered a distinct addition to the public buildings of Los Angeles.

When it was decided to move the St. Vincent's College from Garvanza, that section was made into a new parish, and Rev. Thomas O'Regan, formerly assistant at St. Mary's, was installed as pastor. He immediately set about organizing the parish, and it was through his efforts the large plot of ground, the site of the new church, was purchased.

CREAMERY BRANCHES.
TULARE, Feb. 27.—The property of the Tulare Co-operative Creamery has been purchased by the Los Angeles Creamery Company, according to announcement made here today, and the plants of the former organization will pass into the new management March 1. N. A. Knudsen of Los Angeles, general superintendent of butter manufacture for the Los Angeles Creamery Company, will be placed in charge of the local plant.

Mr. Knudsen will also direct the manufacturing end of other plants owned by the Southern California company in valley dairy districts. Ralph M. Smith, the secretary of the purchasing company, stated while here, that the new owners will put on a motor truck equipment for gathering cream to replace the present horse-drawn vehicles.

Randsburg & Mojave Auto Stage Co. starts business tomorrow. Four trips daily, connecting with all Southern Pacific trains. Passengers leaving at 7:45 a.m. reach Randsburg 1:45 p.m.

DRAMA

AMUSING NONSENSE

MERRY BUNCH OF NOTHINGNESS IS "XANTIPPE."

By Henry Christen Warnick.

When a play is only a lot of nonsense about nothing at all, when it starts from nowhere and gets to the same place, when its plot is as thin as holes in the midnight sky, when you can forgive it anything but cause it makes no pretensions.

"Believe Me Xantippe," the vehicle of the Morisco Stock Company this week is just that sort. Its intentions are not honorable because it has no intentions, and they are not honorable for the same reason.

It is just a merry bunch of nonsense. Yet it cannot be blamed for this because it does not claim to be anything else than what it is.

On the programme it is put down as a comedy in four acts, but this is probably the fault of the billing. It is a cross between a farce and a caricature. The farce stuff has to do with its lines and its situations, and the caricature applies to the sheriff and the county jail system.

There is only one possible way for this play to get by and that is to regard the popularity of the season with a fine with a stock company whose same audience sees the same people and both are willing to take part in a picnic of the sort. The play is perfectly well that the audience is entitled to so long as his conduct is compared with that of an officer and a madman, and where the heroine has a clear line of a rich young New York who makes a bet of \$10,000 that he can commit a crime and escape the long arm of the law for a year. It does this to achieve contempt for officers of the peace.

You know without going any further that the second act must present the inevitable cabin in the mountains with Edmund Lowe standing into its midst to lead nobody at all until presently the heroine comes to hear him use his favorite word, wherever she promptly comes to with a gun, and he refuses to use during the remainder of the act, in spite of a dozen opportunities to do so, simply because the play has to go on for four acts and couldn't go on if he got away in the middle of the second.

Not for anything would I be understood as saying either of these things. I wouldn't want anybody to think that I thought "Believe Me Xantippe" was any kind of a play, but I would rather believe that I thought it was better than most of the plays that are being put on here.

It is a laugh all the way through, and the play is a good deal better than the acting is. The acting is certainly a good deal better than the acting is, and they meet each other in a way that is a laugh all the way through.

There are three women in it, only two of them with anything to do, and they meet each other in a way that is a laugh all the way through.

Frank Darwin again accomplishes a metamorphosis so complex that, on the theory that the good die first, I am constrained to prophesy that he is not long for this world of sin. He deserves to go to a higher and a better sphere and the fact that they hear of him in New York is a little here and there now to return. As a character man he is the best thing we have had in a long day.

N.B.—New York isn't really a "brighter and better sphere" than Los Angeles. It merely has more to offer as a looking point for actors in the field of the spoken drama.

Burbank. "Cross Currents" is the name of the serious picture play at the Burbank this week. It was made by the Fine Arts Film Company, and it stars Miss Helen Ware, a pleasing actress who has the excellent company of the puny Foots, Sam de Gram and other competent persons.

Unfortunately, this is one of those sad pieces which seem to be a bad joke just now and which, however, are classed as a sort of contagion or current sickness. I mean to say, it is a play where the plot is a bad joke, and the acting is a bad joke.

It seems to me that the theatergoers are lately haunted by just one thing, and that is the question of "The Lie." A mighty good good dance it was—then we are taken to the depths at Tully's by the O'Neil, whose soul was in his heart about the same reason and who delivered a life sentence for doing it.

Now comes "Cross Currents" and the rest of us, some men, some women, some children, some of the noblest actors in the world, are not to be deceived. If somebody tells you that the play is a bad joke, do not believe it. It is a play that is a bad joke, and the acting is a bad joke.

Our feelings have been an honest one. We are afraid to go into a house where we should expect the older actors to be, and we are afraid to go into a house where we should expect the older actors to be.

For the "Never-Well but Never-Sick"

Not well enough to enjoy living, yet not sick enough for the doctor—who does not know that dreary, depressing state of "semi-health!" Some of us get it occasionally—"the blues," we call it—others so often that they almost forget what it means to be normal and healthy.

With nerves on edge, digestion uncertain, the mind depressed, our efficiency is reduced day by day. Ambition becomes stunted, our interest in things grows half-hearted. The reason? Our ship of life carries too much cargo—we must unload or else get more power.

Have you ever considered what Sanatogen is able to do in just such cases? Know then that later after letter from carefully observing physicians has told of the splendid effect of Sanatogen in giving fresh fuel to the overworked nerves, fresh building material to the fatigued cells, a fresh impetus to digestion and assimilation.

And what trained physicians observe—no less than 21,000 physicians have in writing approved the use of Sanatogen—the actual use of Sanatogen joyfully confirm. Richard Le Gallienne, for instance, writes: "Several times I have found myself wondering why I

was feeling more fit and then remembered I was taking Sanatogen."

Sir Gilbert Parker, the famous author and statesman, tersely sums up the benefits of Sanatogen when he says: "Sanatogen is to my mind a true food tonic, feeding the nerves, increasing the energy, and giving fresh vigor to the overworked body and mind."

That fresh vigor can be yours too if you will try Sanatogen.

Sanatogen is sold by good druggists, everywhere, in doses from \$1.00 up.
